PLEASE BE ADVISED THAT THE COURSE OFFERINGS IN THIS BOOK REPRESENT COURSES THAT MAY BE OFFERED DURING THE 2019-2020 SCHOOL YEAR. DUE TO CUTS IN STATE FUNDING, CHANGES IN PROGRAMMING, AND OTHER REASONS, THERE IS A POSSIBILITY THAT COURSES MAY BE CUT FROM THIS LIST OF POSSIBLE OFFERINGS. IN THAT EVENT STUDENTS MAY BE ASKED TO MAKE ALTERNATIVE SELECTIONS TO FULFILL GRADUATION REQUIREMENTS.

Dear Parent(s)/Guardian(s) and Students,

This Program of Studies is distributed to explain the 9th, 10th, 11th, and 12th grade curricula and course options offered at Canon-McMillan High School for the 2019-2020 school year. In addition to the course offerings, the Program of Studies contains descriptions of the courses, graduation requirements, and information about special programs available to our students.

Course selection will be completed online and during school hours. Prior to selection by the student, he/she should consult his/her parents/guardians, teachers and appropriate school personnel. It is imperative that the student ensures all academic requirements are met in order to graduate in a timely fashion.

Please take the opportunity to review the course offerings carefully to be certain that you are selecting courses that are of a personal interest and that will fulfill the graduation requirements established by the Canon-McMillan School District. Be certain that you have met the necessary prerequisites for each course requested. If you have questions about course selections, please consult with your counselor and teachers.

Sincerely,

David A. Helinski, M.Ed.
Principal
Canon-McMillan High School

INTRODUCTION

This booklet embodies a variety of information about specific course offerings. The graduation requirements are also specified. They should be read thoroughly by both students and their parents/guardians as they must be fulfilled by every student. Students and their parents/guardians also need to consider the courses that will meet their future professional and/or educational goals. Additionally, a student's ability and motivation are also considerations.

Members of the school counseling department will meet at minimum on a bi-yearly basis with the incoming freshmen and all upperclassmen planning to continue their educational programming at Canon-McMillan High School. Specific details of the scheduling process will be discussed, and questions will be answered in both small group and individual sessions.

This publication is only one avenue for students in choosing their future courses. Students need to discuss potential course offerings with their current teachers and assigned school counselor regarding future scheduling in specific academic areas. At home, students along with their parents/guardian should thoroughly discuss course planning options and accurately complete a course selection sheet. After the signed course selection sheet is returned, the student and/or his or her parents/guardians should make appointments with the assigned counselor if adjustments are needed. Once the scheduling process is completed, adjustments are seldom granted.

GRADUATION REQUIREMENTS

As per Policy #217, the number of credits needed to graduate is **26** planned course units (credits). Thus, students will need to earn **6.75** planned course units (credits) per year to graduate. The Canon-McMillan School District requires students to complete the minimum planned course units (credits) through successful completion of course requirements established by the Canon-McMillan School District and the Pennsylvania Board of Education. **Students must also satisfactorily complete a Graduation Project and demonstrate proficiency on required standardized tests or complete remedial work prior to graduation.**

English – 4 sequential course units* - minimum one course per year.

Math – 4 course units* - Algebra & Geometry units required. Continuous enrollment in Math all 8 semesters in high school. See note 1.

Social Studies – 4 required course units.*

Science – 3 full year course units* - Biology required.

Physical Education/Health – 1 semester of Health; Yearly program in P.E.

21st Century Computer Applications – 1 semester

All additional courses will be electives, including 2 course units which must be from the Arts and Humanities discipline areas.

* Course units are two (2) semesters

HIGH SCHOOL GRADUATION PROJECT

As a component of the graduation requirements outlined by the Canon-McMillan School District, all students will complete a Graduation Project in one or more areas of concentrated study under the guidance and direction of the high school faculty. The Graduation Project should be relevant to the student and presented through a medium that is most appropriate to communicate its purpose. The Project must be completed according to the criteria established by the High School Graduation Project Committee. The Graduation Project will have several components, including developing a plan, selecting a presentation format, establishing a set of procedures and setting a time frame.

GRADUATION WITH DISTINCTION

High School Diploma – The student has satisfied graduation requirements.

High School Diploma of Distinction – The student has satisfied graduation requirements in addition to the following criteria:

- a. **Summa cum laude**- issued to those students with a cumulative grade point average of **4.0 or higher**.
- b. **Magna cum laude**- issued to those students with a cumulative grade point average of **at least a 3.7, but less than a 4.0**.
- c. **Cum laude**- issued to those students with a cumulative grade point average of **at least a 3.0, but less than a 3.7**.

HONOR ROLL

Distinguished Honors 4.0 and above

High Honors 3.7 – 3.99

Honors 3.0 – 3.69

BEGINNING WITH THE CLASS OF 2021 THE CANON-McMILLAN SCHOOL DISTRICT WILL CEASE TO KEEP CLASS RANK FOR STUDENTS

CLASS RANK CALCULATION FOR THE CLASS of 2020 IS AS FOLLOWS:

Class rank is cumulative and is computed at the end of each academic year after final grades have been released. Class rank is based on the total quality points earned for all courses each year. All credits will count toward class rank. Class rank is not based on the GPA reported quarterly on the student's report card. Class rank is calculated using a QPA calculation that weights each quarter equally. The final exam grade is weighted as 10% of the fourth grading quarter.

To determine the final quality point average for a full year course, the quality points earned each quarter will be multiplied by 25% then summed to obtain the final quality points earned. In a semester course, the grades earned each quarter will be multiplied by 50% then summed to obtain the final quality points. The final quality points earned in each class will be multiplied by the Earned Credit for the course to determine the quality point average for each class. The quality point average for each class will then be totaled and divided by the total number of credits attempted.

One credit subjects are assigned the following point values: (A=4), (B=3), (C=2), (D=1), (F=0), and (P=0) points.

Half credit subjects are assigned the following point values: (A=2), (B=1.5), (C=1), (D=.5), (F=0), and (P=0) points.

Honors subjects are assigned the following point value and are worth one credit: (A=4.5), (B=3.5), (C=2.5), (D=1), (F=0) points.

AP subjects are assigned the following point value and are worth one credit: (A=5), (B=4), (C=3), (D=1), (F=0) points.

Pass/Fail courses do not receive quality points and are not averaged in QPA. However, they do affect Honor Roll, and if the course is a required one, the student must pass it to meet the requirement.

****Note: No student is eligible for Honor Roll if a "D," "F," or "I" appears on the report card.**

ACADEMIC/COLLEGE PREPARATORY CURRICULUM

Since the student who is preparing for college admission is faced with a wide variety of admission requirements, it is wise to prepare as fully as possible. Students must make themselves aware of the varying entrance requirements early and plan accordingly.

Colleges and universities are constantly changing admissions requirements. It is no longer possible to make “blanket statements” concerning college admission. A student is encouraged to continue his/her work in the academic courses as long as they are meeting all requirements in their current classes. We do not encourage student selection of inappropriate courses solely for the purpose of “needing it for college admission.” All core courses are college preparatory in nature; students are encouraged to take a rigorous course load as agreed upon by parents/guardians and faculty.

For the most part, the minimum college admission requirements are four credits in English, three credits in academic mathematics, three credits in science, two credits in the same foreign language area of study, three credits in social studies, and as many electives as possible. The current Canon-McMillan graduation requirements exceed some of these prerequisite college admission requirements. Specific course requirements vary by major and college, it is imperative that you share your post-secondary educational interests with your school counselor as soon as possible.

Admission may also be granted to some post-secondary institutions with less than the minimum requirements indicated. However, any student having less than the minimum requirements has a more narrow selection of career and college choices.

Athletes must be sure to meet the current course requirements of the National Collegiate Athletic Association. Please see your school counselor for information on and completion of the NCAA Clearinghouse form. Courses at Canon-McMillan that are accepted by the NCAA will have *NCAA approved* noted in the course description.

THE ADVANCED PLACEMENT PROGRAM

The Advanced Placement (AP) Program is a cooperative educational endeavor with the College Board and is designed for students to secure college credit while in high school. Entrance into the program is based on a student’s grades and teacher recommendation.

AP courses require a great amount of study on the part of the student. They carry one additional full academic quality point and are weighted at 5.0, and normally meet five class periods each week (exception – AP Biology, AP Chemistry, and AP Physics which meet minimum of seven periods a week). In addition, the student is required to spend at least one hour on homework for each hour in the classroom. **It is the expectation of the Advanced Placement Program and Canon-McMillan High School that students enrolling in AP courses are to take the AP exam at the end of the year.**

**All costs of AP Testing are the responsibility of the student.
Fee reductions are available to students who qualify. See your school counselor.**

Please note: The weighted credit is only given to students earning a C or better in the course. For example, the following point values are assigned, (A=5), (B=4), (C=3), (D=1), (F=0).

Presently, the following AP courses are offered in the following discipline areas at Canon-McMillan High School:

AP Biology	AP Music Theory
AP Calculus AB	AP Psychology
AP Calculus BC	AP Physics 1
AP Chemistry	AP Physics C
AP Computer Science A	AP Spanish
AP Computer Science Principles	AP Statistics
AP Environmental Science	AP Studio Art
AP European History	AP United States History
AP French	AP World History
AP Literature and Composition	

A student interested in scheduling AP courses should meet the following criteria:

- Be a conscientious, diligent worker
- Demonstrate a high degree of interest in the subject area
- Attain the required teachers' recommendations and fulfill course prerequisites
- Have the encouragement of his or her parents/guardians
- Demonstrate a commitment in taking the Advanced Placement examination in the spring.

COURSES OF STUDY OFFERED AT THE WESTERN AREA CAREER AND TECHNOLOGY CENTER:

Students who fail to maintain academic requirements may be subject to Summer School or removed from WACTC.

COOPERATIVE EDUCATION

Cooperative Education (Co-op) is an educational work experience for students to relate classroom experience to real world employment. It is available to vocational students in all provided specialized areas at Western Area Career and Technology Center. Students connect classroom learning with work based learning experiences that teach employability skills and support supervised on-the-job training. Co-op provides students an opportunity to work with employers, educators, community leaders, other students and parents. It prepares students for the “real world.” This program enables students to match specific career objectives with paid employment experiences while they attend planned periods of related classroom theory during school. This program is only offered to Seniors who are in good academic standing, with good attendance, and who have received the recommendation of their WACTC teacher.

Total	6.75						

Total credits needed 26.00

Total credits with proposed scheduled ... 28.00

*Electives in grade 9-12 must include two credits in the Arts or Humanities disciplines

SCHEDULING REQUIREMENTS

All students must carry a minimum of 6.75 credits each year, including the state mandated physical education requirement and a lunch period.

Students failing a required subject are to include it on their course selection for the following year, or to make plans to take it in an approved summer school program. All students are encouraged to schedule as many courses as possible to enrich their program of study and to improve their class rank.

In order to take the second year of a sequential subject, students should pass the first year by earning at least a “C” or better unless otherwise indicated by course prerequisites. Students who earn a “D” and wish to continue in any sequential subject, such as a language or a math course, may improve their skills either by going to summer school or by repeating the course.

Special attention should be given to subjects that must be taken concurrently.

SCHEDULE CHANGES

Students should consult the Course Catalog in order to make informed choices concerning future schedules. *Course selection will be completed online and during school hours.* Prior to selection by the student, he/she should consult his/her parents/guardians, teachers and appropriate school personnel. It is imperative that the student ensures all academic requirements are met in order to graduate in a timely fashion. Once proposed courses are scheduled, **no changes will be made.** If a proposed schedule is not completed online, then the school counselors will devise a course schedule. **Absolutely no schedule changes will be permitted in these situations.**

SUMMER SCHOOL

It is the responsibility of the student to inform the guidance personnel when an approved summer school class (or classes) has been completed to ensure proper class assignments. Transcripts will remain incorrect if guidance personnel are not informed.

LEARNING SUPPORT PROGRAM

Learning Support services are provided for those students in need of academic or emotional support as identified by an Individualized Education Program (IEP).

Students who meet the eligibility requirements for Learning Support services are enrolled in one or more areas in which specially designed instruction is provided based upon the student's need and the goals and objectives of the IEP.

GIFTED PROGRAM

Gifted support services are provided for those students who meet the eligibility requirements (GIEP) as designated by federal and state guidelines.

HIGH SCHOOL MEDIA CENTER

LIBRARY SCIENCE

Grades 9, 10, 11, 12

The Library Science program is integrated throughout the high school curriculum to provide each student with information fluency. The program provides a wide range of resource materials and opportunities to develop information-seeking and management skills to use the selected resources. The high school librarian and the classroom teachers plan collaborative learning experiences to achieve the goals articulated in the PA Core and the Common Core. The students develop and apply information literacy skills by exploring, analyzing and evaluating print and non-print resources, school subscription databases, POWER Library resources and Internet pathfinders. The use of Web tools and technology is an integral part of the library information experience. In addition, the program is directed toward developing and promoting lifelong reading by offering fiction and non-fiction materials. Through the use of an online citation tool and excellent reference materials, the Library Science program supports curriculum, research for various class projects, and for the senior graduation project.

COURSE DESCRIPTIONS

The following courses may be taken at Canon-McMillan High School by students having fulfilled the proper prerequisites.
Sequential subjects must be taken in order.

ART

CONCEPT & CREATIVE THINKING

7503

Grades 10, 11, 12

Credit 1.00

Prerequisite: INTRO TO ART and MEDIA & TECHNIQUE or Teacher Approval

“Ideas”—future employers are seeking graduates who think creatively. In this course, students will work with a variety of art media as they develop creative thinking skills. Emphasis will be on providing opportunities that challenge the student to seek new ideas and unique solutions to artistic problems. **This course is recommended for higher level students with the ability to think abstractly.**

FORM AND FUNCTION

7512

Grades 10, 11, 12

Credit 1.00

Prerequisite: INTRO TO ART and MEDIA & TECHNIQUE or Teacher Approval

Students will explore the form and function of objects, as they design and create useful and/or decorative items in a variety of media. Projects may include lanterns, bowls, mugs, jewelry and frames. Emphasis will be on design.

INTRO TO ART

7501

Grades 9, 10, 11, 12

Credit .50

No Prerequisite

This course will provide the student with an understanding of the foundations of art, including aesthetics and art criticism, development of observational skill, composition and creative thinking. Students will work with a wide range of media and study significant works of art to develop both technical skill and conceptual understanding. **This course is required for advancement in the art program.**

MEDIA & TECHNIQUE

7502

Grades 9, 10, 11

Credit 1.00

No Prerequisite

Students in this course will explore various two-dimensional and three-dimensional art media from watercolor to clay. Emphasis will be on developing technical skill. **This course is required for advancement in the art program.**

OBSERVATIONAL DRAWING

7509

Grades 9, 10, 11, 12

Credit .50

No Prerequisite

Drawing and the ability to “see” is necessary to all visual art forms. This is a studio course designed for the serious art student to assist in developing observational skills and the ability to accurately and effectively create drawings from observation of subjects: objects, still-life, portrait, figure and landscape (live and photographed). This course requires additional sketchbook assignments to be completed outside of class.

VISUAL ARTS COMMUNICATIONS

7508

Grades 10, 11, 12

Credit 1.00

Prerequisite: INTRO TO ART and MEDIA & TECHNIQUE or Teacher Approval This course will provide the student with an in-depth understanding of the arts as a powerful communications tool throughout history as well as in today’s increasingly visual world. All work will be approached within a cultural/historical context with an emphasis on strengthening communication skills. **Students should be aware that this course involves reading and writing in conjunction with studio projects in order to facilitate learning about communication throughout history.**

ADVANCED ART HONORS

7506

Grades 11, 12

Credit 1.00

Prerequisites: Interview/portfolio review and teacher recommendation. Advanced Art is designed for high school juniors or seniors who are considering the continuation of their art education at a university or college level pursuant to a career in the visual arts. Students will prepare a traditional and digital portfolio and gain comprehensive exhibit experience by active participation in a senior show. **This course requires extensive work outside of class and is recommended for higher level students with the ability to work independently.**

AP STUDIO ART (ADVANCED PLACEMENT)

7510

Grade 12

Credit 1.50*

Prerequisites: A or B in Advanced Art (Honors) and teacher recommendation. The AP Studio Art program is a national standard for performance in the visual arts. This course provides the high school senior with an opportunity to continue the individualized instruction and independent artistic pursuits initiated in Advanced Art Honors. It is blocked as a two period course for intensive studio work and will require extensive work outside of class.

***AP STUDIO ART (ADVANCED PLACEMENT) LAB**

9810

Grade 12

Must be taken concurrently with AP STUDIO ART (ADVANCED PLACEMENT) Course 7510.

BUSINESS EDUCATION

BUSINESS DEPARTMENT CURRICULUM

The curriculum of the Business Department at Canon-McMillan High School is designed to provide two pathways which will prepare students for an entry-level position in the workplace or provide them with core courses which will introduce them to careers in business as they further their education at a post-secondary institution.

Our computer technology courses provide specialized instruction on state-of-the-art equipment and software. With the exception of prerequisites, the courses can be selected at any grade level and scheduled interchangeably during the course of their sophomore, junior, and senior years. With successful development of their skills, students may obtain workplace competencies to be employed upon graduation. The business core electives offer courses for students to explore various careers in business that may interest them when furthering their post-secondary education. This component of career clusters is comprised of accounting, finance, marketing, management, and law.

An integration of computer technology courses and career electives would provide an ideal schedule for interested students. The career education standards obtained in each cluster would complement each other to provide the best preparation for students interested in pursuing a career in business.

COMPUTER TECHNOLOGY

Business Math

Entrepreneurship I

Entrepreneurship II

Personal Finance

Sports and Entertainment Management

Principles of Marketing

***Any college bound student interested in majoring in business should take as many of these electives as possible.**

21st CENTURY COMPUTER APPLICATIONS

6620

Grades 9 (required), 10, 11, 12

Credit .50

Students will develop skills required to meet the new state standards in computer technology. These skills include a basic review of keyboarding in addition to a working knowledge of word processing, spreadsheets, and presentation applications to produce creative documents, informative reports, and eye-catching presentations. 21st Century Computer Applications is a prerequisite for all other computer-related courses within the business department.

ACCOUNTING I

6601

Grades 10, 11, 12

Credit 1.00

The student in Accounting I will be given an insider's view into the world of accounting. Concepts to be learned include the fundamentals of debits and credits, journalizing, posting in general and subsidiary ledgers, and preparing and analyzing financial statements. Accounting I will supplement textbook activities with relevant computer applications.

ACCOUNTING II	6602
Grades 11, 12	Credit 1.00
<u>Prerequisite: Accounting I.</u> This course further develops skills for the successful Accounting I student by giving a more in-depth and detailed view of the many aspects of accounting. Individual accounts will be examined and scrutinized in order to make sound business decisions. This course will also allow for successful financial reporting and analysis for the three primary business types: proprietorships, partnerships, and corporations. The students will also be introduced to accounting software and the use of spreadsheets.	
ACCOUNTING III HONORS	6603
Grade 12	Credit 1.00
<u>Prerequisite: Successful Completion of Accounting II with a letter grade of “B” or better or consent by instructor.</u> Students will develop advanced skills that build upon those acquired in Accounting II. Focus will be on accounting for a corporation, with an emphasis on financial reporting and analysis. Computerized accounting tools will also be utilized in great detail as students will be expected to show competence in spreadsheet and accounting software.	
ADVANCED EXCEL – MICROSOFT OFFICE SPECIALIST *(MOS) CERTIFICATION	6668
Grades 10, 11, 12	Credit .50
<u>Prerequisite: Successful completion of 21st Century Computer Applications</u> If you plan to go into the business world or are college bound, be prepared! This course will boost your skills in the use of Microsoft Excel through “hands on” applications. Upon successful completion of this course, students can earn Microsoft Office Specialist (MOS) certification. MOS certification is an industry standard certification given by Microsoft Corporation.	
ADVANCED MS WORD with *MOS CERTIFICATION	6669
Grades 10, 11, 12	Credit .50
<u>Prerequisite: Successful completion of 21st Century Computer Applications</u> Be equipped to enter college or the business world! This course will strengthen your skills in MS Word through the use of integrated software and realistic projects. You will also have the opportunity to take the MOS Certification test which is an industry standard test given by the Microsoft Corporation. If you pass this test, Microsoft certifies you as an Office Specialist which will help you when you are applying for future employment.	
ADVANCED POWERPOINT with *MOS CERTIFICATION	6671
Grades 10, 11, 12	Credit .50
<u>Prerequisite: Successful completion of 21st Century Computer Applications</u> PowerPoint is the industry standard presentation software being used today. This course will strengthen your skills in PowerPoint through the use of realistic and fun projects. You will also have the opportunity to take the MOS Certification test which is an industry standard test given by the Microsoft Corporation. If you pass this test, Microsoft certifies you as an Office Specialist which will help you when you are applying for future employment.	
*The MOS Certification test is an industry standard test that is given by the Microsoft Corporation. They test the students and if they can pass the test up to their standards, they are certified as an Office Specialist on that piece of software. The test is fairly difficult and is a big accomplishment for high school students. This certification will allow them to test out of any basic classes on this software at the college level and goes with them when they are applying for future employment. Our students have the opportunity to walk out of here with 3 industry standard certifications (MS Word, Excel, and PowerPoint). CMHS is among few high schools in the area offering this opportunity to students making CMHS stand out among other students in the area.	
BUSINESS AND CONSUMER LAW	6667
Grades 11, 12	Credit .50
Business and Consumer Law is a one semester course that familiarizes the student with some of the basic principles of law in personal law and the business field. Some principles that will be studied are, understanding the sources of law, enforcing the law, court structures, and understanding the differences between criminal and civil law. Also included is a short intro to contract law. All material is presented in a manner that the ordinary citizen can understand and use. Students will participate in a mock trial at the end of the semester.	
BUSINESS MATH	6305
Grade 12 - Math credit in Grade 12	Credit 1.00
Business Math is a two-part course. During the first semester, students will be introduced to Personal Finance topics such as gross and net pay, taxes, savings and investing, and debt. Students will be required to apply basic math skill to these topics and solve linear equations. Students will also learn how to fill out a basic 1040EZ form for completing their own taxes. The second semester is	

focused on business topics such as Personnel, Purchasing, Production, Sales, Marketing, and Financial Statements supported by textbook work along with a virtual business simulation. It culminates with each student running a virtual restaurant and virtual hotel. This course is recommended for students with little or no personal finance background and/or students wishing to pursue a business curriculum after graduation or planning to someday operate their own business.

DESKTOP PUBLISHING

6616

Grades 10, 11, 12

Credit .50

Desktop Publishing is a one semester course that is devoted specifically to introducing desktop publishing and communication skills needed in today's business environment. Upon completion of this course, students will be able to effectively demonstrate skills in the areas of desktop publishing, creativity, and decision making. The main emphasis will be the production of brochures, posters, newsletters, reports, etc. Electronic communication methods as well as presentation applications will be explored to supplement the effective use of desktop publishing.

ENTREPRENEURSHIP I

6624

Grades 9, 10, 11, 12

Credit .50

Have you ever dreamed of owning your own business and being the boss? Could you be the next Bill Gates (Microsoft), Oprah Winfrey (Harpo Productions), or Mark Zuckerberg (Facebook)? These famous entrepreneurs started with a great idea. This semester course will familiarize students with the planning, organization, and operation of a business enterprise. During the semester, students will participate in a business ownership simulation.

ENTREPRENEURSHIP II

6700

Grades 10, 11, 12

Credit .50

Prerequisite: Successful completion of Entrepreneurship I and the recommendation of the instructor.

This one semester course will give students hands-on, practical experience with managing and operating a business. In conjunction with students enrolled in Foundations of Technology, Entrepreneurship II students will help to operate The CM Store. Product development, financing, financial record keeping, staffing issues, pricing, and promotion will be topics addressed in this course.

PERSONAL FINANCE

6622

Grades 9, 10, 11, 12

Credit .50

Personal Finance will help students better understand basic monetary principles used to manage their finances and plan for the future. The students will study earning and managing income (including managing a checking account), saving and investing (stock market basics) in the long and short term, the impact of the Federal Reserve, managing credit, and basic taxes. These principles will be demonstrated through the use of classroom projects and simulations. This is a fast paced course which requires the ability to work independently and demonstrate good time-management skills.

PRINCIPLES OF MARKETING

6623

Grades 10, 11, 12

Credit .50

Principles of Marketing will introduce the students to the concepts of product development, advertising and promotion, distribution, pricing, and basic communication skills. Mastery of these topics will be demonstrated through the completion of classroom projects and simulations.

SPORTS AND ENTERTAINMENT MANAGEMENT

6666

Grades 10, 11, 12

Credit .50

Students will be introduced to the principles of managing a business, with an emphasis on sports and entertainment industries. Other issues affecting the contemporary business will be explored. These include the social and ethical responsibilities of business, legal concerns, and marketing and promotion of a business. Students will utilize discussion, case studies, business simulations, and technology in order to meet the learning objectives of the class.

WEB PAGE DESIGN AND DEVELOPMENT

0582

Grades 10, 11, 12

Credit .50

This course is intended for any student who wishes to gain experience in the creation of web pages. Students in this course will learn concepts and theories associated with the design and development of web pages. Instruction will deal with the raw coding of HTML as well as an in-depth discussion of software editors in use to create web pages. Graphic preparation, navigation, functionality, and aesthetics will be addressed. Students will critique and discuss web pages as well as produce various pages. Each student will be responsible for the creation and production of a web site as completion of the course requirements.

ENGLISH

ENGLISH 9 Grade 9	1104 Credit 1.00
This course is designed to strengthen and extend communication skills in reading, writing, speaking, and listening. Reading skills are strengthened through the study of short stories, novels, poetry, and drama. Concentration in grammar is on sentence structure and usage through the writing process and research skills.	
ENGLISH 9-ACADEMIC Grade 9 <i>NCAA Approved</i>	1106 Credit 1.00
<u>Prerequisites: This course requires a final grade of an “A” or “B” in English 8 with a teacher recommendation.</u>	
English 9-Academic is designed to prepare students for English 10-Academic. Students develop skills in oral and written communication, research, grammar, usage and mechanics, vocabulary in context, and analysis of literature. Students engage in interpretive reading, analytical discussion, and analytical writing.	
ENGLISH 9-HONORS Grade 9 <i>NCAA Approved</i>	1103 Credit 1.00
<u>Prerequisite: This course requires a final grade of an “A” in English 8 with a teacher recommendation and completion of the summer enrichment assignment.</u>	
English 9-Honors is designed to prepare students for English 10 Honors and is an in-depth study of oral and written communication, literature, research, grammar, usage and mechanics, and vocabulary. Students engage in more extensive and comprehensive reading, discussion, and writing than in the English 9-Academic curriculum.	
ENGLISH 10 Grade 10	1101 Credit 1.00
English 10 is designed to prepare students for English 11. This course encompasses fundamental skills in research, grammar, oral and written communication, vocabulary, and the study and appreciation of various genres of texts and media. Research, grammar, and usage and mechanics are integrated with reading, writing, and speaking skills.	
ENGLISH 10-ACADEMIC Grade 10 <i>NCAA Approved</i>	1102 Credit 1.00
<u>Prerequisite: This course requires a final grade of an “A” or “B” in English 9-Academic or English 9 with a teacher recommendation.</u>	
English 10-Academic is designed to prepare students for English 11-Academic. The course offers a thorough treatment of classic works of literature and requires reading beyond the English 10 curriculum. Skills in research, grammar, usage and mechanics, as well as vocabulary in context are integrated with the study of literature. Emphasis is placed on discussion and writing that develop analytical skills.	
ENGLISH 10-HONORS Grade 10 <i>NCAA Approved</i>	1130 Credit 1.00
<u>Prerequisite: This course requires a final grade of an “A” in English 9-Honors or English 9-Academic with a teacher recommendation and completion of the summer enrichment assignment.</u>	
English 10-Honors is designed to prepare students for English 11-Honors. English 10-Honors includes an intensive study of various genres of classic literature. Special emphasis is placed on interpretive, analytical and evaluative skills through close reading, discussion, research, and writing.	
ENGLISH 11 Grade 11	1111 Credit 1.00
English 11 is designed to prepare students for English 12. The course emphasizes close reading and class discussion as a means to analyze and interpret fiction and non-fiction. Through reading and analyzing texts from various genres, students will develop reading and vocabulary skills. In addition, students will also develop writing skills that emphasize the fundamentals of grammar, research, usage, and mechanics.	

ENGLISH 11-ACADEMIC 1112
Grade 11 *NCAA Approved* Credit 1.00
Prerequisite: This course requires a final grade of an “A” or “B” in English 10-Academic or English 10 with a teacher recommendation. English 11-Academic is designed to prepare students for English 12-Academic. The course will offer a thorough treatment of classic novels from literature and will emphasize close reading, class discussion, analysis, and interpretation. Skills in research, grammar, usage and mechanics, as well as vocabulary in context are integrated with the study of literature. Emphasis is also placed on writing that develops analytical skills.

ENGLISH 11-HONORS 1131
Grade 11 *NCAA Approved* Credit 1.00
Prerequisites: This course requires a final grade of an “A” in English 10-Honors or English 10-Academic with a teacher recommendation and completion of the summer enrichment assignment. English 11 Honors offers an in-depth treatment of literature that includes classic novels and selected works from the classroom survey text. Skills in research, grammar, usage and mechanics, as well as vocabulary in context are integrated with the study and appreciation of literature. Special emphasis is placed on discussion and composition that develop analytical skills. A close reading of the works and detailed note taking that includes student responses and questions are required for insightful discussions and effective writing.

ENGLISH 12 1122
Grade 12 Credit 1.00
English 12 will emphasize close reading, formal and technical writing, and communication skills through the study of various genres of texts and media, via group work, individual assignments, and class discussion and activities as a means to analyze and interpret fiction and nonfiction, as well as, vocabulary in context are integrated with the study of the genres studied. In addition, students will also develop writing skills that emphasize the fundamentals of grammar, research, usage, and mechanics. In this course, the students will complete a research paper required for the Graduation Project.

ENGLISH 12-ACADEMIC 1121
Grade 12 *NCAA Approved* Credit 1.00
Prerequisite: This course requires a final grade of an “A” or “B” in English 11-Academic or English 11 with a teacher recommendation. English 12-Academic is designed to primarily improve analytical reading and formal writing skills. Through a close reading of British literature, students will analyze, interpret, and respond to both fiction and nonfiction. In addition, the evolution of the English language will be traced while reading poetry, novels, short stories and plays. Students will incorporate grammar, usage, and documentation skills into a variety of writings. In this course, students will complete a research paper required for the Graduation Project.

ENGLISH 12-HONORS 1123
Grade 12 *NCAA Approved* Credit 1.00
Prerequisite: This course requires a final grade of an “A” or “B” in English 11-Honors or a final grade of an "A" in English 11-Academic with a teacher recommendation.
English 12-Academic is designed to primarily improve analytical reading and formal writing skills. Through a close reading of British and American literature, students will analyze, interpret, and respond to both fiction and nonfiction. In addition, the evolution of the English language will be traced while reading poetry, novels, short stories and plays. Students will incorporate grammar, usage, and documentation skills into a variety of writings. In this course, students will complete a research paper required for the Graduation Project as well as prepare for the presentation.

AP LITERATURE AND COMPOSITION (ADVANCED PLACEMENT) 1124
Grade 12 *NCAA Approved* Credit 1.00
Prerequisites: This course requires a final grade of an “A” in English 11-Honors with a teacher recommendation, and completion of the summer enrichment assignment. This course is meant to improve the student’s ability to find meaning and technique in literature by interacting with the text through notes, discussion, and written analyses. Students closely read significant works of literature from the Middle Ages to the present: poems, essays, plays, stories and novels. As they read, they often take notes about an author’s rhetorical devices and ideas or take notes that include their own questions and comments. They analyze, interpret, and respond to these works in small and large group discussions. Reading, note taking, and discussions provide a springboard for writing in-class and out-of-class essays. In this course, the students will complete a research paper required for the Graduation Project.

CREATIVE WRITING	1512
Grades 11, 12 <i>NCAA Approved</i>	Credit .50
Prerequisite: An “A” or “B” in English. Creative writing is a semester course that focuses on assignments that require imaginative thought, descriptive language, and creative presentation. Students will be responsible for the materials necessary to complete their projects.	
DRAMA I	1514
Grades 9, 10, 11	Credit .50
This one semester course introduces the student to acting and to the origins of drama through the study of theatre history, pantomime, storytelling, improvisational theatre, technical stage terminology for the actor, script writing, monologue and scene work. Students will develop skills in the analysis of dramatic literature for performance through memorization and through written critical response.	
DRAMA II	1447
Grades 10, 11, 12	Credit 1.00
Prerequisite: an “A” or “B” in Drama I. This year long course starts with intensive character development work and then moves to exploring the world of Shakespeare from the actor’s perspective. Areas of focus are script analysis, character study, voice and speech, body language and expression used in Shakespeare’s work. Contemporary, historical, and student-written scene and monologue work is rehearsed and performed. The students will also explore theatrical history/the influence of major playwrights.	
DRAMA III/IV	1446
Grades 11, 12	Credit 1.00
Prerequisite: an “A” or “B” in Drama II/III. This is a year-long course that continues the study of intensive scene and monologue work. Both Shakespearean plays and major American and European playwrights’ works are explored, in addition to the development and presentation of student-written projects. This course also develops directorial skills and culminates in the planning and directing of a one act play.	
EXPLORING POETRY	1543
Grades 9, 10, 11, 12 <i>NCAA Approved</i>	Credit .50
This course is designed to allow students to explore poetry: to discuss what poetry is, to identify types of poetry, to learn how to read poetry as well as how to write poetry. Students will also search for the meaning and understanding of a poem by answering the who, the what, the when, the where, the why, and the how of a poem. Selected poets will also be researched and studied.	
GREAT BOOKS	1522
Grades 10, 11, 12 <i>NCAA Approved</i>	Credit .50
In this course students follow the reading/discussion program of the Great Books Foundation. They closely read and discuss short, provocative pieces from important philosophers, historians, psychologists, scientists, and writers of imaginative literature, e.g., Aristotle, Locke, Tocqueville, Freud, Kant, Kafka, and Hobbes.	
PREPARATION FOR THE SAT I REASONING TEST	1518
Grades 10, 11, 12	Credit .50
This one semester course is designed to familiarize college bound students with the SAT I Reasoning Exam. The course objective is to focus on time constraints, strategies, and approaches to tackling the essay prompt, the verbal sections, and the math questions on the exam.	
PUBLIC SPEAKING I	1519
Grades 9, 10, 11, 12 <i>NCAA Approved</i> (1 Unit Maximum)	Credit .50
Public speaking does not need to be a scary experience. In fact, it can be fun. In this course students will learn various techniques to improve their public speaking skills. Some of the key objectives of the course are for students to learn to use conversational speaking tones, to maintain positive eye-contact, and to use non-verbal communication skills to augment the effectiveness of any speech. The relaxed and mutually supportive atmosphere sets the tone for a comfortable and valuable learning experience.	

PUBLIC SPEAKING II**1521****Grades 9, 10, 11, 12** *NCAA Approved* (1 Unit Maximum)**Credit .50**

Prerequisite: Public Speaking I and teacher recommendation. This course is an extension of the skills learned in Public Speaking I. Because of the relaxing and supportive atmosphere, students build their skill levels to a much greater degree. This class celebrates the ability that the students have to move away from the lectern towards a more sophisticated style of speaking that involves some memorization. In addition, the use of PowerPoint technology is integrated into the curriculum for this class. Students in Public Speaking II will build upon skills mastered in Public Speaking I and will learn new skills that will be of benefit to students both in future schooling and in career goals.

TECHNICAL DRAMA I**1524****Grades 10, 11, 12****Credit .50**

Prerequisite: An art, drama or technology class, or teacher approval.

Students will explore various areas of technical theatre to include the following: design for sets, lighting, costumes, and makeup. Practical application of learned concepts will be applied through a play design project, which will utilize math, reading, mechanical drawing and artistic rendering skills. A brief history of technical theatre will also be included in this course.

TECHNICAL DRAMA II/III**1449****Grades 10, 11, 12****Credit 1.00**

Prerequisite: "B" or better in Technical Drama I/II

Students continue to study technical theatre through more extensive designs and construction skills used for a school production. The culminating project will be to supply the technical needs for the one-act plays directed by Drama III/IV classes.

FAMILY AND CONSUMER SCIENCES

EARLY CHILDHOOD EDUCATION I

7567

Grades 11, 12

Credit .50

Prerequisite: Students must have a satisfactory health and discipline record for entrance into this course.

Early Childhood Education I is a study of child development from birth through five years of age. During this course students will learn about theories of child development, best practices for guiding children's behavior, and developmentally appropriate practices for teaching preschool children. The beginning of the course will prepare students for working as teachers in the Canon-McMillan High School Preschool. The preschool is held four days a week at the high school and includes community children between the ages of three and five. Students will work in groups to plan lessons, teach elementary concepts, maintain a clean and safe classroom, and guide children through play activities. Grading will be based on written lesson plans, class projects, teaching experiences, child observations and play interactions with preschool children.

EARLY CHILDHOOD EDUCATION II

7568

Grades 11, 12

Credit .50

Prerequisites: Students must have maintained a "C" or better average in Early Childhood Education I and have a satisfactory health and discipline record for entrance into this course.

Early Childhood Education II is the second level course discussing theories of child development and working in the Canon-McMillan High School Preschool. Students will function as early childhood educators as they plan and implement lessons for children between the ages of three and five. Students will spend four days a week working with preschool children and one day a week studying concepts of child development with an emphasis on curriculum. Students will work in groups to plan lessons, teach elementary concepts, maintain a clean and safe classroom, and guide children through play activities. Grading will be based on written lesson plans, class projects, written assignments, teaching experiences, child observations, and play interactions with preschool children.

FAMILY AND COMMUNITY STUDIES

7569

Grades 9, 10, 11, 12

Credit .50

Family and Community Studies is a course that discusses daily life when living away from home. During this class, we will explore topics of food and government, consumer economics, global food issues, principles of design, and service to the community. We will spend a good portion of class time working in the food lab and the remainder on individual or group projects.

FOODS AND NUTRITION

7565

Grades 10, 11, 12

Credit .50

Prerequisite: Successful completion of Family and Community Studies or Global Cuisine with a "C" or better average.

Foods and Nutrition is a course that will build on the skills and principles learned in Family and Community Studies and/or Global Cuisine. In this course, we will focus on food and nutrition principles that will help students understand the relationship between eating and health. Students will explore issues pertaining to calories and energy, dieting guidelines, the nutrients, healthy eating habits, nutritional needs across the lifespan and current trends in nutrition. Throughout this course students will be working in lab groups to prepare a variety of recipes.

GLOBAL CUISINE

7571

Grades 9, 10, 11, 12

Credit .50

Global Cuisine is an introductory course that focuses on basic preparation and cooking skills while learning how food impacts people all around the world. Students will work in groups and share responsibilities in order to prepare various food products. Students will be able to identify tools, ingredients and techniques to prepare a variety of foods for themselves and others. Throughout the course we will discuss the social aspects of eating, U.S. Regional cuisine and international cuisine.

FOREIGN LANGUAGE

FRENCH I

5531

Grades 9, 10, 11, 12 *NCAA Approved*

Credit 1.00

Prerequisite: A “C” average in the current level of study is required in order to register for the next course in the sequence. Students earning an “A” or “B” in Level I are not permitted to repeat Level I.

French I is an introduction to the French language and culture. Emphasis is placed on basic vocabulary, grammar, and verb usage. Students will focus on the Present tense of regular verbs. Oral pattern drills, small group conversations and listening comprehension activities help to reinforce the learning process. Writing activities are used on a daily basis in order to support oral patterns. Culture is interwoven throughout the course and allows the students to develop an appreciation of the francophone world. The textbook series **Bien Dit!** has an online component which allows students to access an online textbook, interactive activities, assignments and assessments. Authentic materials and videos will further enrich the student’s knowledge of the francophone culture.

FRENCH II

5532

Grades 9, 10, 11, 12 *NCAA Approved*

Credit 1.00

Prerequisite: “C” average in French I. French II is a continuation of the first level with reinforcement on vocabulary and grammar. Everyday expressions and common idioms will continue to be used in order to strengthen communication skills. The vocabulary base will be broadened and an in-depth study of regular and irregular verbs will be emphasized. Additional tenses will be introduced including *Passé Composé* and the *Imparfait*. The textbook series **Bien Dit!** has an online component which allows students to access an online textbook, interactive activities, assignments and assessments. Authentic materials and videos will further enrich the student’s knowledge of the francophone culture. A “C” average in the current level of study is required in order to register for the next course in the sequence.

FRENCH III

5533

Grades 10, 11, 12 *NCAA Approved*

Credit 1.00

Prerequisite: “C” average in French II. French III is a continuation of the first level with reinforcement on vocabulary and grammar. Everyday expressions and common idioms will continue to be used in order to strengthen communication skills. The vocabulary base will be broadened and an in-depth study of regular and irregular verbs will be emphasized. Additional tenses will be introduced. The textbook series **Bien Dit!** has an online component which allows students to access an online textbook, interactive activities, assignments and assessments. Authentic materials and videos will further enrich the student’s knowledge of the francophone culture. A “C” average in the current level of study is required in order to register for the next course in the sequence.

FRENCH IV HONORS

5534

Grades 11, 12 *NCAA Approved*

Credit 1.00

Prerequisite: “C” Average in French III. This advanced French course is intended for the student who wishes to refine his or her ability to use French for communication. A primary goal of this course is to further strengthen the ease and confidence with which the student uses French for self-expression. This course is designed to consolidate the foundation established in levels one, two, and three. The student will become quite knowledgeable about pronunciation that would be acceptable to the ear of a native speaker. The ability to understand French when spoken by a native speaker at a normal rate of speed will be increased dramatically during this course. Daily opportunities will be provided for the student to practice self-expression in both spoken and written format. Reading material will include literary works. **Bien Dit!** has an online component which allows students to access an online textbook, interactive activities, assignments and assessments. Finally, this course is the logical bridge to the Advanced Placement French Language course. An A or B in French IV Honors plus teacher recommendation is required to continue to Advanced Placement French.

AP FRENCH (ADVANCED PLACEMENT)

5530

Grade 12 *NCAA Approved*

Credit 1.00

Prerequisite: An “A” or “B” in French IV and teacher recommendation. The Advanced Placement French language course is designed to meet the needs of students who plan to prepare for the French Language Advanced Placement Examination. Upon completion of the course the student will be able to understand French when spoken by an educated native in both formal and conversational situations. Students will speak with accuracy and fluency using appropriate pronunciation and intonation. They will also read magazine articles, and literary works. Students will periodically present oral reports. Ideas will be expressed accurately and fluently in writing. Instant recollection of a wide range of vocabulary and structure is required to communicate without hesitation in both written and spoken format. The student must prepare to devote one hour outside of class for each hour spent in class.

- GERMAN I** 5546
Grades 9, 10, 11 *NCAA Approved* Credit 1.00
Prerequisite: A “C” in the current level of study is strongly recommended in order to register for the next course in the sequence. German I introduces the learner to functional and basic vocabulary and the rich German culture. Everyday expressions and common idioms employing the present tense of verbs will be used to introduce pattern drills of grammar and enhance pronunciation skills. Students will begin to develop the skills of reading and writing in the target language. Through cooperative learning exercise (dialogues, paired drills), the students will gain self-confidence in speaking and reinforce their listening comprehension abilities.
- GERMAN II** 5547
Grades 10, 11, 12 *NCAA Approved* Credit 1.00
Prerequisite: A “C” in the current level of study is strongly recommended in order to register for the next course in the sequence. German II will provide the student with reinforcement of the skills learned in German I. The vocabulary base will be broadened and an in-depth study of regular and irregular verb conjugations will be emphasized. Reading comprehension and writing skills will reflect the expanded vocabulary and the concentration on mechanics. The student will be encouraged to focus on pronunciation and spontaneity by using the language daily in the classroom setting. Authentic materials will further enrich the student’s knowledge of culture.
- GERMAN III** 5548
Grades 11, 12 *NCAA Approved* Credit 1.00
Prerequisite: A “C” average in the current level of study is strongly recommended in order to register for the next course in the sequence. This course will provide daily opportunities for students to use the communication skills they learned in the previous levels of German. Students will expand their vocabulary even further and will concentrate on more difficult grammar and sentence construction. An in-depth study of the past tense and of the dative and accusative cases will be emphasized. Therefore, this course is not recommended for students who do not have a strong command and understanding of grammar. Students will also practice using their reading, writing and listening comprehension skills in German. Finally, this class will integrate the study of language and culture in a way that encourages curiosity and an appreciation for different cultural beliefs.
- GERMAN IV HONORS** 5549
Grade 12 *NCAA Approved* Credit 1.00
Prerequisite: A “C” average in the current level of study is required in order to register for the next course in the sequence. In this advanced course, students will be expected to speak German exclusively. They will use their knowledge of grammar and vocabulary to express themselves effectively. Students will continue to write and perform skills in German to practice their developing communication skills. Upon completion of this course students will be able to understand German when spoken by native speakers and will be able to converse with a native at an intermediate-low proficiency level. Students will be introduced to German literature such as short stories, fairy tales, poetry and articles, which will require a more extensive vocabulary. In addition, they will refine their writing skills with personal essays, letters, etc. Students will also increase their understanding of German culture, as it is today and was in the past, based on their study of historical and contemporary texts and authentic materials.
- LATIN I** 5538
Grades 10, 11, 12 *NCAA Approved* Credit 1.00
Prerequisites: Students who wish to enroll in Latin I must be at least a sophomore and have an “A” or “B” average in their current Academic or Honors English course. The student must be willing and able to put forth the required time associated with learning a second or third language. Students enrolled in other foreign languages are encouraged to take Latin I concurrently with their level 3 and 4 classes. This course is intended for the academic and honors student. Students will gain an in-depth knowledge of Latin grammar, vocabulary, and syntax. Their studies will include all five declensions of nouns, all three declensions of adjectives and all four conjugations of verbs. This course will include an intense concentration on translation of Latin stories into English. Cultural and historical events will be included through Latin readings and English lectures.

LATIN II 5539
Grades 11, 12 *NCAA Approved* Credit 1.00
Prerequisites: Students who wish to enroll in Latin II must be at least a junior and must have completed Latin I with an A or B average. This course is intended for the academic and honors student who has completed Latin I with an A or B final average. Students will finish the study of grammar begun in Latin I. Vocabulary will be augmented and include specialized words used in the writings of Julius Caesar and Cicero. Students will use and manipulate verbs in all tenses, moods, and voices. In Latin II the focus shifts from a grammar based language to one that is read and discussed. Students will, midway through the course, begin reading the authentic Latin Literature of Cicero and Caesar.

ADVANCED LATIN HONORS 5540
Grades 12 *NCAA Approved* Credit 1.00
Prerequisite: This course is intended for the academic and honors student who has completed Latin II. Advanced Latin is a course designed solely with the intent of reading and discussing Latin prose and poetry. Students will read works from such authors as Virgil, Catullus, Horace, Pliny, Martial, and Sallust. Selection of authors will be tailored to the interest of the students, but selections from a variety of authors will be read.

SPANISH I 5542
Grades 9, 10, 11, 12 *NCAA Approved* Credit 1.00
Prerequisite: A “C” average in the current level of study is required in order to register for the next course in the sequence. Students earning an “A” or “B” in Level I are not permitted to repeat Level I. Spanish I gives the student a general knowledge of basic Spanish grammar and focuses on both regular and irregular forms of the present tense. These principles are applied in mechanical drills, conversation in the target language, basic vocabulary, and Spanish customs and songs. Cultural aspects will be discussed and analyzed with special emphasis on holidays. Written practice will be required with special attention to orthography. Class participation will be evaluated. The textbook series **Avancemos** has an online component which allows students to access the online textbook, interactive activities, assignments and assessments.

SPANISH II 5543
Grades 9, 10, 11, 12 *NCAA Approved* Credit 1.00
A “C” average in the current level of study is required in order to register for the next course in the sequence. The second level course is designed to increase listening and speaking proficiency and to continue the development of reading comprehension and writing skills begun in Spanish I. A more comprehensive view of culture is presented with an aim toward broadening the student’s insight and appreciation of Hispanic customs and traditions. The main focus of the grammatical study will be the preterit and imperfect tenses. The textbook series **Avancemos** has an online component which allows students to access the online textbook, interactive activities, assignments and assessments.

SPANISH III 5544
Grades 10, 11, 12 *NCAA Approved* Credit 1.00
A “C” average in the current level of study is required in order to register for the next course in the sequence. Spanish III is a highly academic, advanced language course which not only provides a comprehensive review of previously studied grammar and vocabulary, but is designed to prepare the student for college level intermediate Spanish. The imperfect and preterit tenses will be compared and contrasted. The subjunctive mood of verbs will be studied as well as the future and conditional tenses and some technical grammatical concepts. Students will be expected to attempt accurate pronunciation in auditory comprehension. The textbook series **Avancemos** has an online component which allows students to access the online textbook, interactive activities, assignments and assessments.

SPANISH IV HONORS 5545
Grades 11, 12 *NCAA Approved* Credit 1.00
Prerequisite: A “C” average in the current level of study is required in order to register for the next course in the sequence. This course is intended for the serious minded student who wishes to refine his or her ability to communicate in Spanish. The student will be required to speak in Spanish during the class. A complete review of all grammatical concepts will be undertaken. The imperfect subjunctive tense will be studied as well as subtle grammatical concepts that will perfect their Spanish. Students will attempt to perfect their grammatical form and vocabulary through creative writing assignments and oral presentations. The abridged version of Cervantes novel “Don Quixote” will be read and discussed. In the 4th quarter the students will prepare and present a 10-minute PowerPoint presentation in the target language

AP SPANISH (ADVANCED PLACEMENT)

5500

Grade 12 *NCAA Approved*

Credit 1.00

Prerequisite: An “A” or “B” in Spanish IV Honors plus teacher recommendation is required to continue to Advanced Placement Spanish. Spanish (AP) is intended for the student who wishes to increase his/her ability to utilize the Spanish language for communication purposes. It is ideal for those who intend to major or minor in Spanish in college. This course covers rare grammatical structures and difficult idioms. The student will use a variety of material as well as practice tests to prepare for the A.P. exam in May.

HEALTH & PHYSICAL EDUCATION

HEALTH

7006

Grade 9

Credit .50

NOTE: This course is required for graduation. The purpose of this course is to provide students with the ability to examine their lifestyles, select goals, and make plans to achieve and maintain optimum health and wellness. This involves choosing behaviors that help prevent illness and accidents, promote health for self and others and improve the quality of the environment.

PHYSICAL EDUCATION

Grades 9, 10

7013 Credit .25

Grades 11, 12

7001 Credit .25

NOTE: This is a required, yearly course for graduation, mandated by the PDE. This program of sports is a medium which leads to independent learning of human movement and behavior. The exciting nature of sport serves to increase learning because the cognitive, affective and psychomotor processes of the student participant are engaged. The co-educational/selective program of activities ranges from basic and advanced physical education instruction to lifetime and recreational activities. By offering a varied program and fitness assessments, the general objectives of physical education may be realized in an interesting and challenging manner.

FUNDAMENTALS OF SWIMMING (*This course does not count as P.E. credit*)

7011

Grades 9, 10, 11, 12

Credit .50

Student in this course will practice the American Red Cross Learn-To-Swim Skill Levels 1 through 6. This course is intended for non-swimmers and students who wish to improve their basic swimming skills and develop confidence in the water. Skilled swimmers are also welcome as class activities will include water games and swimming for aerobic endurance.

*ENRICHMENT SUMMER SCHOOL PHYSICAL EDUCATION

.25

Grades 9, 10, 11, 12

Students who wish to make room for an additional elective in their academic schedule for the 2018-2019 school year may elect to take Physical Education during the summer of 2018. This program is open to all students at a cost to parents who wish to enroll their student in this program. Enrollment and payment must be completed online at a date yet to be determined. **Proof of online enrollment and payment must be submitted at a date yet to be determined.**

*ENRICHMENT SUMMER SCHOOL HEALTH

.50

Grade 9

Students who wish to make room for an additional elective in their academic schedule for the 2018-2019 school year may elect to take Health during the summer of 2018. This program is open to all students at a cost to parents who wish to enroll their students in this program. Enrollment and payment must be completed online at a date yet to be determined. **Proof of online enrollment and payment must be submitted at a date yet to be determined.**

Please follow the prerequisites and consult with your math teacher.

8th	9th
PA Core Algebra 1	Geometry Honors (must have at least a B average in Algebra 1 and pass the Keystone exam) Geometry Academic (must have at least a C average in Algebra 1) Algebra 1 Academic
Pre-Algebra Academic	Algebra 1 Academic (must have an A average in Pre-Algebra Academic) Algebra 1 (must have a B average in Pre-Algebra Academic) Algebra 1A
Pre-Algebra	Algebra 1 (must have an A average in Pre-Algebra and teacher recommendation) Algebra 1A

For current high school students:

Find your grade level and math course, then follow the chart to the right for 2019 – 2020 course choices. See the individual course descriptions for pre-requisites. If your grade level and math course do not match, consult with your math teacher.

9th	10th	11th	12th
Geometry Honors Geometry Academic	Algebra 2 Honors Algebra 2	AP Statistics Pre-Calculus Honors Pre-Calculus	AP Calculus BC AP Calculus AB AP Statistics Physics Business Math
Algebra 1 Academic Algebra 1	Geometry Honors Geometry Academic Geometry	Algebra 2 Honors Algebra 2	Pre-Calculus Honors Pre-Calculus Trigonometry (seniors only) Physics Business Math
Algebra 1A	Algebra 1B	Geometry	Algebra 2 Business Math

Note: Students may also elect courses from the Computer Sciences after successful completion of Algebra 1. Computer Science courses are electives. Physics counts as a math credit for SENIORS ONLY.

Course Descriptions:

ALGEBRA 1A

3365

Grade 9 *NCAA Approved* (1 Unit Maximum)

Credit 1.00

This course is a basic Algebra 1 course for students. The course will begin by covering operations with real numbers and expressions. The students will then receive instruction in basic algebraic concepts including solving linear equations and inequalities, graphing linear equations, and finding the slope of a line. This course will begin to prepare students for the Keystone Algebra Exam. Algebra 1B will be taken immediately following this course.

ALGEBRA 1B

3366

Grade 10 *NCAA Approved* (1 Unit Maximum)

Credit 1.00

This course will continue with the concepts from Algebra 1A, covering solving and graphing linear inequalities, and solving systems of equations/inequalities. Students will also learn various data analysis. The course in conjunction with Algebra 1A will prepare students for the Keystone Algebra Exam. Students will take the Keystone Algebra Exam at the end of this course.

ALGEBRA 1

3304

Grade 9

Credit 1.00

This course is an introduction to the basic concepts and laws of Algebra. The course will begin by covering operations with real numbers and expressions. Then students will write, solve, and graph linear equations and inequalities, including systems of equations/inequalities. Functions will also be discussed with application problems. The course will then move on to various data analysis. This course will prepare students for the Keystone Algebra Exam. Students will take the Keystone Algebra Exam at the end of this course.

ALGEBRA 1 ACADEMIC

3380

Grade 9 *NCAA Approved*

Credit 1.00

This course is an introduction to the basic concepts and laws of Algebra. The course will begin by covering operations with real numbers and expressions. Then students will write, solve, and graph linear equations and inequalities, including systems of equations/inequalities. Functions will also be discussed with application problems. The course will then move on to various data analysis. This course will prepare students to take the honors level courses at the high school with increased rigor and limited calculator use. This course will prepare students for the Keystone Algebra Exam as well. Students will take the Keystone Algebra Exam at the end of this course.

ALGEBRA 2

3321

Grade 10, 11, 12 *NCAA Approved*

Credit 1.00

Prerequisite: Students must have a “C” average from any Geometry class. Algebra 2 builds upon the skills that were learned in Algebra 1. This course begins with a brief overview of Algebra 1 topics, then students will solve systems of equations and inequalities, solve and graph quadratic equations, rational equations, radical equations, exponential equations, logarithmic equations and absolute value equations and inequalities.

ALGEBRA 2 HONORS

3381

Grade 10, 11 *NCAA Approved*

Credit 1.00

Prerequisite: Students must pass the Keystone Algebra exam prior to taking this course. Students must have a C average in Geometry Honors or a B average in Geometry Academic. Students will be required to complete a summer assignment, which will be assessed. Algebra 2 builds upon the skills that were learned in Algebra 1. This course includes solving systems of equations and inequalities, solving and graphing quadratic equations, rational equations, radical equations, exponential equations, logarithmic equations and absolute value equations and inequalities. Time permitting, additional topics (basic trigonometry, analytical geometry) beyond the above material will also be studied. This course will prepare students to take the honors level courses at the high school with increased rigor and limited calculator use.

* BUSINESS MATH

Grade 12

See Course Description in “Business Education” section (Page 14)

GEOMETRY 3332

Grades 10, 11 Credit 1.00

Prerequisite: Students must complete an Algebra 1 course (or Algebra 1A and Algebra 1B). This course will include basic geometric concepts such as angles, congruence and similarity theorems, polygons, area and volume of two-dimensional and three-dimensional figures.

GEOMETRY ACADEMIC 3314

Grades 9, 10, 11 *NCAA Approved* Credit 1.00

Prerequisite: Students must have a C average in Algebra 1 Academic or a B average in Algebra 1. This course will include the study of coordinate systems, transformations, measurement formulas, basic geometric terminology and concepts, three-dimensional figures, surface areas, deductive proofs of congruent and similar figures, circles, and right triangle trigonometry.

GEOMETRY HONORS 3301

Grades 9, 10 *NCAA Approved* Credit 1.00

Prerequisite: Students must have a B average in Algebra 1 Academic or an A average in Algebra 1. Students will be required to complete a summer assignment, which will be assessed. Geometry Honors is a rigorous course with limited calculator use intended for an AP bound student. Topics include the rectangular coordinate system, transformations, measurement of length, area and volume, congruent and similar figures, circles, deductive proofs, polygons, and right triangle trigonometry.

PRE-CALCULUS 3343

Grades 11, 12 *NCAA Approved* Credit 1.00

Prerequisite: Students must have a C average in Algebra 2 Honors or a B average in Algebra 2. This course begins with a brief review of Algebra 2 skills then moves on to Pre-Calculus topics. These topics include the study of linear, quadratic, radical, rational, exponential and logarithmic functions and their inverses. Trigonometric topics include trigonometric identities, radian measure, right triangle trigonometry, the Laws of Sines and Cosines and trigonometric inverse functions. Applications of trigonometry are included when appropriate. This course will also cover topics from Analytical Geometry.

PRE-CALCULUS HONORS 3344

Grades 11, 12 *NCAA Approved* Credit 1.00

Prerequisite: Students must have a B average in Algebra 2 Honors. Students will be required to complete a summer assignment, which will be assessed. This course begins with a brief review of Algebra 2 skills then moves on to Pre-Calculus topics. These topics include a rigorous approach to the concept of linear, quadratic, radical, rational, absolute value, exponential and logarithmic functions and their inverses. Trigonometric concepts include trigonometric identities, radian measure, right triangle trigonometry, the Laws of Sines and Cosines and trigonometric inverse functions. Applications of trigonometry such as linear velocity and angular speed are included when appropriate. This course will also cover topics from Analytical Geometry. The intent of this course is to prepare students for AP Calculus BC.

TRIGONOMETRY 3364

Grade 12 *NCAA Approved* Credit 1.00

Prerequisite: Students must have a C average in Algebra 2. This course is for seniors ONLY. This course begins with a review of Algebra 2 topics then moves on to trigonometry topics. These topics include definitions of the trig functions, finding function values of angles, solving right triangles, radian measure, circular functions, trigonometric identities, inverse trig functions, trig equations, Law of Sines, and Law of Cosines.

AP CALCULUS AB 3340

Grade 12 *NCAA Approved* Credit 1.00

Prerequisite: Students must have a C average in Pre-Calculus Honors or a B average in Pre-Calculus. Students will be required to complete a summer assignment, which will be assessed. This course is intended for students who have a thorough knowledge of college preparatory mathematics, including algebra, geometry, trigonometry and analytic geometry. The course focuses on differentiation, integration, and various applications within those topics. Students who succeed in this course will be prepared to take the AP exam in May.

AP CALCULUS BC	3341
<i>Grade 12 NCAA Approved</i>	Credit 1.00
<u>Prerequisite: Students must have an A average in Pre-Calculus Honors. Students will be required to complete a summer assignment, which will be assessed.</u> This course is intended for students who have a thorough knowledge of college preparatory mathematics, including algebra, geometry, trigonometry and analytic geometry. The course focuses on differentiation, integration, and various applications within those topics. We will discuss parametric, polar, and vector functions and analyze various sequences and series. Students who succeed in this course will be prepared to take the AP exam in May.	
AP STATISTICS	3345
<i>Grades 11, 12 NCAA Approved</i>	Credit 1.00
<u>Prerequisite: Students must have an A average in Algebra 2 Honors and Geometry Honors and a recommendation from the teacher of the math and English courses taken immediately prior to this selection. Students will be required to complete a summer assignment, which will be assessed.</u> AP Statistics is divided into these areas of concentration: graphing and analyzing data, probability and probability distributions, observational studies, surveys and experiments, and hypothesis testing and intervals. Students interested in this course must be critical thinkers with strong emphasis in reading and writing skills. This course will enable students to process information and provide supportive conclusions about data. Students will conduct studies and experiments on real world data and evaluate information and write well-organized summaries. This course will enable students to better understand the world of data and statistical claims that surround them and to use higher order thinking to analyze this information critically.	
ADVANCED TOPICS IN COMPUTER SCIENCE (HONORS)	3361
<i>Grades 11, 12 NCAA Approved</i>	Credit .50
<u>Prerequisite: AP Computer Science with a “C” average or better.</u> This course provides students the opportunity to continue the study of computer science beyond the core curriculum. Areas covered include: advanced data structures, formal analysis of algorithms, advanced C++ class construction, and graphics.	
COMPUTER PROGRAMMING IN VISUAL C#	3351
<i>Grades 9, 10, 11, 12 NCAA Approved</i>	Credit .50
<u>Prerequisite: Computer Science I with a “C” or better.</u> This course introduces computer programming concepts using the language C# and Microsoft's Visual Studio 2015. Students will create full-featured Windows applications and write the mathematical algorithms needed to create these applications. Concepts include: event-driven Window programming, numeric and Boolean data types, operators, objects and properties, and control structures.	
COMPUTER SCIENCE I	3348
<i>Grades 9, 10, 11, 12 NCAA Approved</i>	Credit .50
<u>Prerequisite: Algebra I with a “C” or better.</u> This course is an introductory course in Computer Science and should be taken by any student planning on future studies in Mathematics, Engineering, Science, or Business. The students will study programming methodology and write algorithms using the C++ programming language. Variables, arrays, input-output, selection, repetition and functions will be used to write these algorithms. This course is the prerequisite for all higher level Computer Science courses.	
COMPUTER SCIENCE II	3360
<i>Grades 9, 10, 11, 12 NCAA Approved</i>	Credit .50
<u>Prerequisite: Computer Science I with a “B” or better.</u> This course is designed to give students an understanding of advanced programming concepts using the object oriented programming language Java. Topics include: built-in and user defined data types, objects, classes, methods, arrays, inheritance, and interfaces. This course is the prerequisite for the AP Computer Science A (programming in Java) course.	
AP COMPUTER SCIENCE A	3362
<i>Grades 10, 11, 12 NCAA Approved</i>	Credit 1.00
<u>Prerequisites: Computer Science I and Computer Science II with a “B” average or better and teacher recommendation.</u> This course is equivalent to a one-semester college introductory Computer Science course using the Java programming language. The topics will include a study of topics from Computer Science II plus abstract classes, searching and sorting, ArrayLists, recursion, stacks, queues, and the AP case studies and labs. Students who take this course will be prepared to take the Computer Science A exam in May.	

AP COMPUTER SCIENCE PRINCIPLES

3382

Grades 9, 10, 11, 12 *NCAA Approved***Credit 1.00****Prerequisites: Students must have successfully completed Algebra I with a “B” or better or Algebra 1 Academic with a “C” or better.**

The AP Computer Science Principles course develops computational thinking skills in the context of creative problem solving. The primary goal of the course is to introduce students to the foundational concepts of computer science and challenge them to explore how computing and technology can impact the world. Students will learn about ways to analyze and study data, work with large data sets, and draw conclusions from trends. Although the skill sets developed in this class are prescribed by the course’s core curriculum, the exact ways in which students apply them will vary. The AP Computer Science Principles course puts emphasis on the student’s creation of the context for their own work. They will create solutions to real world problems and issues. Students enrolled will create a digital portfolio of artifacts throughout the year, culminating with the advanced placement exam. There will also be two Performance Tasks to complete and submit as part of the AP requirements: Explore and Create Performance Tasks. This course is designed to fulfill a college level introduction to computer science course. Students who take this course will be prepared to take the Computer Science Principles exam in May.

MUSIC

AMERICAN POPULAR MUSIC

9581

Grades 9, 10, 11, 12

Credit .50

Students are presented with the historical development of American popular music that begins with the nineteenth century and continues through the end of the twentieth century. Students study, discuss and listen to various styles including Ragtime, Blues, Jazz, Musical Theater, Rhythm and Blues, Country, Folk, Rock and Roll, the British Invasion, and Today's Sounds. Sound reproduction and the use of electronics in popular music are also discussed.

AP MUSIC THEORY (ADVANCED PLACEMENT)

9586

Grades 10, 11, 12

Credit 1.00

Prerequisites: Students must have prior music reading experience. The goal of the course is to advance the students ability to recognize, understand, and describe the intricate materials and processes of music that are heard or presented in a score. This course will continue to expand the student's study of musicianship, theory, and the procedures which integrate the aspects of melody, harmony, texture, rhythm, form, advanced musical analysis, composition, history and style to the college level. This course utilizes a web based text with differentiated instruction and allows the student to supplement learning with a variety of internet and written resources. Musicianship skill including dictation, listening skills, sight-singing, and keyboard harmony are also required.

BAND HONORS

9582

Grades 9, 10, 11, 12

Credit 1.00

Prerequisite: Students with previous instruction on wind or percussion instruments may enroll for Band. The material studied in this course will include a varied repertoire of concert and marching music, advanced rhythms, harmonies, ensemble performance techniques and dynamic interpretation. A student who schedules band is required to participate in both the "Big Mac" Marching Band and the Canon-McMillan High School Concert Band. Summer and evening rehearsals and performances are required.

BELLA VOCE

9587

Grades 9, 10, 11, 12

Credit 1.00

Prerequisite: Bella Voce membership is attained by audition only. Bella Voce involves advanced vocal technique and repertoire. A variety of choral styles are presented at numerous school, community, and public events. Bella Voce also performs for adjudications during the school year. A high degree of individual vocal quality, a positive attitude, and a serious group commitment are required of all members. Some morning, evening and weekend hours are required to fulfill performance requests.

CONCERT CHOIR/TREBLE CHOIR

9588

Grades 9, 10, 11, 12

Credit 1.00

Concert Choir/Treble Choir performs a variety of advanced choral repertoire based upon advanced technique, high performances level, and experience. Important considerations for membership include group commitment and positive individual contribution to goals and objectives. Concert Choir sings at scheduled performances during the school year. After school rehearsals and concerts are mandatory. Grading is based on in-class performance, tests, participation, and attendance at rehearsals and concerts.

CONCERT CHOIR/BASS CHOIR

New Course #

Grades 9, 10, 11, 12

Credit 1.00

Concert Choir/Bass Choir performs a variety of advanced choral repertoire based upon advanced technique, high performances level, and experience. Important considerations for membership include group commitment and positive individual contribution to goals and objectives. Concert Choir sings at scheduled performances during the school year. After school rehearsals and concerts are mandatory. Grading is based on in-class performance, tests, participation, and attendance at rehearsals and concerts.

JAZZ ENSEMBLE

9593

Grades 9, 10, 11, 12

Credit .50

Prerequisite: In order to schedule Jazz Ensemble, a student must also be scheduled for Band. An audition is required.

*This selection is offered in the second semester only. Band members play who saxophone, trumpet, trombone, guitar, bass, guitar, bass guitar, piano or drums and pass and audition are eligible to schedule Jazz Ensemble. This course includes the study of medium difficult to difficult swing, swing ballad, shuffle jazz waltz, rock, rock ballad, funk, bossa and reggae music in a Big Band setting. The history of jazz and the study of advanced improvisation are also included in the curriculum. After school rehearsals, performances and competitions may be required.

JAZZ LAB BAND

9592

Grades 9, 10, 11, 12

Credit .50

Prerequisite: In order to schedule Jazz Lab Band, a student must also be scheduled for Band. *This selection is offered in the first semester only. Band members who play saxophone, trumpet, trombone, guitar, bass guitar, piano or drums are eligible to schedule Jazz Lab Band. This course includes the study of medium easy swing, swing ballad, shuffle, jazz waltz, rock, rock ballad, funk, bossa and reggae music in a Big Band setting. The history of jazz and the study of basic improvisation is also included in the curriculum. After school rehearsals and performances may be required.

MARCHING BAND UNITS

7005

Grades 9, 10, 11, 12

Credit .25

Prerequisite: Acceptance in Auxiliary Marching Band Squad (Canonettes, Flag Corps, Majorettes) through a competitive audition process. This Course is for Canon-McMillan High School Marching Band auxiliary members who do not participate in Concert Band. Students will participate in all scheduled marching band activities. Summer, weekend and after school/evening rehearsals are a requirement of the course.

PIANO LAB

9590

Grades 9, 10, 11, 12

Credit .50

This course is a practical course that enables students to develop basic keyboard proficiency at the beginning to intermediate level. Students will begin the course at the level at which they are able and will continue to progress at their own speed throughout. Students with some piano experience should discuss their skills and situation with the teacher so that ample learning can be achieved for each individual. The course content may include, but not be limited to the following:

- Basic Keyboard Skills
- Individual and Ensemble Piano Technique
- Music Literacy
- Music Theory
- Performance Etiquette
- Sight Reading and Ear Training
- Elements and Characteristics of Music
- Performance Analysis and Evaluation

WORLD PERCUSSION ENSEMBLE

9595

Grades 9, 10, 11, 12

Credit .50

Prerequisite: In order to schedule World Percussion Ensemble a student must also be scheduled for Band. Band members who have an interest in playing a variety of percussion instruments and pass an audition are eligible to schedule World Percussion Ensemble. This course of study will focus on fundamental drumming, mallet percussion, Caribbean steel drums, Brazilian batucada, African drumming and traditional percussion ensemble repertoire. The cultures of Trinidad and Tobago as well as Brazil and Africa will be emphasized throughout the course. After school rehearsals, performances and competition may be required.

SCIENCE

All science classes include laboratory experiences; however, those courses that have a credit value of 1.50 meet for an additional lab period every other day. To succeed in any of the Honors or AP Science courses, students should be self-motivated and proactive in seeking assistance from their instructor with concepts or calculations they do not understand. There will be little review time in class. Students should be aware that absences should be kept to a minimum as they will have an adverse effect on grades and the lab experience.

PENNSYLVANIA SCIENCE 9 W/LAB

4436

Grade 9 *NCAA Approved*

Credit 1.00

Prerequisite: This course requires a final grade of a “C” in 8th grade science. Pennsylvania Science 9 integrates the basic principles of scientific methods, data analysis, chemistry, biology, ecology, and environmental science. The overall theme of the course is to apply scientific principles and the scientific method to understanding the natural and man-made processes that affect our environment. This class stresses problem solving through the application of knowledge. The course relies on lectures, discussions, outside reading, guest speakers, laboratory experiences and field work. Pennsylvania Science 9 provides the foundation for continued study in the biological sciences.

PENNSYLVANIA SCIENCE 9 ACADEMIC W/LAB

4442

Grade 9 *NCAA Approved*

Credit 1.00

Prerequisite: This course requires a final grade of a “B” in 8th grade science. Pennsylvania Science 9 Academic integrates the basic principles of scientific methods, data analysis, chemistry, biology, ecology, and environmental science. The overall theme of the course is to apply scientific principles and the scientific method to understanding the natural and man-made processes that affect our environment. This class stresses problem solving through the application of knowledge. The course relies on lectures, discussions, outside reading, guest speakers, in-depth laboratory experiences and field work. Pennsylvania Science 9 Academic provides the foundation for continued study in the biological sciences.

PENNSYLVANIA SCIENCE 9 HONORS W/LAB

4435

Grade 9 *NCAA Approved*

Credit 1.00

Prerequisites: This course requires an “A” in 8th grade science with a teacher recommendation. The students must also earn a “B” average in PA Core Algebra 1 OR an “A” average in Pre-Algebra Academic. In addition, the student must have scored Proficient or Advanced on the 8th grade PSSA test. This course requires the completion of a summer enrichment assignment and the course will move at a fast and rigorous pace. Pennsylvania Science Honors has a more in-depth mathematical curriculum along with more extensive writing assignments than the Pennsylvania Science 9 Academic w/Lab course. Pennsylvania Science Honors integrates the basic principles of scientific methods, data analysis, chemistry, biology, ecology, and environmental science. The overall theme of the course is to apply scientific principles and the scientific method to understanding the natural and man-made processes that affect our environment. This class stresses problem solving through the application of knowledge. The course relies on lectures, discussions, outside reading, guest speakers, in-depth laboratory experiences and field work. Pennsylvania Science 9 Honors provides the foundation for continued study in the biological sciences.

BIOLOGY W/LAB

4438

Grades 10, 11, 12 *NCAA Approved*

Credit 1.00

Prerequisite: This course requires a final passing grade in PA Science 9. Biology Academic is a course designed to address the knowledge and application of living systems, including biochemistry, cells, genetics, molecular biology, evolution and ecology. Laboratory work is integral to the course. A state-mandated Biology Keystone exam is given at the end of this course.

BIOLOGY ACADEMIC W/LAB

4443

Grades 10, 11, 12 *NCAA Approved*

Credit 1.00

Prerequisite: This course requires a final grade of a “B” in PA Science 9 Honors or PA Science 9 Academic with current science teacher approval. A final grade of an “A” in PA Science 9 with current science teacher approval. Biology Academic is a course designed to address the knowledge and application of living systems, including biochemistry, cells, genetics, molecular biology, evolution and ecology. Laboratory work is integral to the course. A state-mandated Biology Keystone exam is given at the end of this course.

BIOLOGY HONORS W/LAB

4437

Grade 10 (Grade 11 and 12 – Transfer students only) *NCAA Approved*

Credit 1.00

Prerequisite: This course requires a final grade of an “A” or “B” in PA Science 9 Honors with current science teacher recommendation. “A” in PA Science 9 Academic with current science teacher recommendation. This course requires the completion of a summer enrichment assignment. Honors Biology is a rigorous course designed to address academic, laboratory and communication skills needed to understand and to demonstrate knowledge of living systems. Topics include biochemistry, cells, genetics, molecular biology, evolution, and ecology. Inquiry-based labs, detailed lab write-ups, and supplemental reading are requirements of this course. A state-mandated Biology Keystone exam is given at the end of this course.

CHEMISTRY 1 W/LAB

4445

Grades 10, 11, 12 *NCAA Approved*

Credit 1.50

Prerequisites: “B” average in Algebra 1 Academic or Algebra 1. “B” average in Biology 10 Honors or Biology 10 Academic. Sophomores must have completed Algebra 1 Academic with a “B” average or Algebra 1 with an “A” average AND be enrolled in Biology 10 Honors. CHEMISTRY 1 is intended for students who are planning careers in science, medicine, and engineering. The subject matter of CHEMISTRY 1 is organized for modern theoretical development. There will be a strong emphasis on using a problem solving approach. The presentation of chemical theory is on the structure and periodicity of the existing elements as well as chemical behavior and stoichiometry. All subject matter is further reinforced by practical laboratory application and technique. *Upon completion of this course students can take Advanced Chemistry Honors or AP Chemistry AND/OR any other science electives.*

ADVANCED CHEMISTRY HONORS W/LAB

4402

Grades 11, 12 *NCAA Approved*

Credit 1.50

Prerequisites: “B” average in Chemistry 1 w/lab. “B” average in Algebra 2 Honors or Algebra 2 OR be currently enrolled in Algebra 2 Honors or Algebra 2. This course requires the completion of a summer enrichment assignment. The Advanced Chemistry course is designed to be the equivalent of the general chemistry course usually taken during the first semester of college (General Chemistry 101). The course contributes to the development of the students’ abilities problem solve and to express their ideas, orally and in writing, with clarity and logic. This course differs qualitatively from AP Chemistry with the kind of textbook used, the topics covered, the emphasis on chemical calculations and the mathematical formulation of principles, and the kind of laboratory work done by the students. This course is intended for the student who wants an additional year of chemistry but not the rigors of an AP course.

PHYSICS HONORS W/LAB

4418

Grades 11, 12 *NCAA Approved*

Credit 1.50

Prerequisite: “B” average in Algebra 2 Honors or an “A” average in Algebra 2. Physics is a science which attempts to describe events occurring in nature using the language of mathematics. This course is structured around the concepts of motion, energy, and wave properties. Topics include measurement and analysis of data, motion, force, energy, light, sound, and electricity. Laboratory work, including the use of computers as a data collection and analysis tool, is a major component of the course. Math principles will be applied to a variety of physical situations, so students should have a good command of algebra. Seniors may take Physics Honors as a math credit IN PLACE OF a science credit. Physics Honors MAY NOT be used as both a math and a science credit toward graduation requirements.

ACADEMIC ZOOLOGY W/LAB

4440

Grades 11, 12 *NCAA Approved*

Credit .50

Prerequisites: “A” average in Biology or a “B” average in Biology Academic or Biology Honors. Zoology is the study of animals, including their classification, structure, physiology, and evolution. This course is intended for those students interested in learning about animal anatomy, adaptations, and behavior. Discussions, supplemental readings, papers, and presentations are requirements of this course. This is a semester course and does not count as one of the three science credits needed to graduate.

- ASTRONOMY AND GEOLOGY W/LAB** **4409**
Grades 10, 11, 12 NCAA Approved **Credit 1.00**
This course blends the two subjects into one science that explains the threefold connection between humans, Earth, and the universe. Students begin with an introduction to size and distance relationships in the universe, the connection between space and time, the history of cosmology, and the theories explaining the nature of the universe. The course continues by examining theories of stellar formation and evolution and the subsequent formation of planetary systems. Topics addressed include forces, motion, matter, and energy along with practical observations of historic and current astronomical events. Once students are aware of Earth's position in space, they are presented with its composition and dynamics. Included in the Geology portion of the course is a study of tectonics, geologic history, mountain building, earthquakes, volcanoes, and an extensive examination of rocks and minerals. Labs include mineral and rock testing/identification, epicenter location, and interstellar distance calculations. Astro/Geo is a course that builds upon students' understanding of various Earth systems and will give them a deeper understanding of the nature of the universe and Earth's place therein.
- ENVIRONMENTAL SCIENCE W/LAB** **4407**
Grades 11, 12 NCAA Approved **Credit 1.00**
Prerequisite: Successful completion of Pennsylvania Science and Biology. Environmental Science focuses on the study of the basic principles of ecology, including food chains/food webs, biomes, and ecosystem relationships and the role and impact of human activities on natural systems. Environmental Science allows students to develop opinions through reasoning and laboratory exercises. Students are required to complete projects and presentations in this course. The course utilizes a variety of presentations, visuals, outdoor activities, and guest speakers.
- HUMAN ANATOMY and PHYSIOLOGY HONORS W/LAB** **4408**
Grades 11, 12 NCAA Approved **Credit 1.00**
Prerequisites: "B" average in Biology 10 Honors or Biology 10 Academic AND "B" average in Chemistry 1 w/lab.
The class is an advanced course designed to provide a comprehensive study of the anatomy and physiology of the human body. Topics include body organization, homeostasis, cytology, histology, and the integumentary, skeletal, muscular, nervous, cardiovascular, respiratory, digestive, urinary, and reproductive systems. Class includes lectures, discussions, and labs. The course is intended for and geared toward those students interested in medical professions and biological sciences.
- INTRODUCTION TO FORENSIC SCIENCE W/LAB** **4422**
Grades 11, 12 NCAA Approved **Credit .50**
Prerequisites: "C" average in Biology Honors or Biology Academic. Forensic Science is the application of science to law. This course is intended for those students interested in learning the discipline of Forensic Science and crime scene investigation. Students enrolled in this course will attain basic scientific knowledge in a wide range of fields including, but not limited to: crime scene analysis, DNA fingerprinting, hair and fiber analysis, forensic serology, fingerprinting identification and handwriting analysis. This is a semester course and does not count as one of the three science credits needed to graduate
- ORGANIC CHEMISTRY HONORS** **4439**
Grades 11, 12 NCAA Approved **Credit 1.00**
Prerequisite: "B" average in Chemistry 1 w/lab. Organic Chemistry Honors is a demanding elective course that deals with the chemistry of carbon compounds. This course focuses on four aspects: formula writing, structure, nomenclature, and basic organic reactions. Various types of organic molecules will be studied as well as the reactions that they undergo. This course is recommended for those who are planning to major in chemistry, medicine, pharmacy, biology, nursing or veterinary medicine.
- AP BIOLOGY (ADVANCED PLACEMENT) W/LAB** **4421**
Grades 11, 12 NCAA Approved **Credit 1.50**
Prerequisites: "B" average in Biology 10 Honors AND a "B" average in Chemistry 1 w/lab with teacher approval from both courses. This course requires the completion of a summer enrichment assignment. Advanced Placement Biology is designed to be the equivalent of a college introductory biology course usually taken by biology majors during the first year. The course centers on the four "big ideas" as prescribed by the College Board: Evolution, Cellular Processes, Energy and Communication (Genetics and Information Transfer) and Interactions. Twenty-five percent of the class is spent and assessed on the performance of laboratory investigations including detailed analysis and application.

AP CHEMISTRY (ADVANCED PLACEMENT) W/LAB 4412

Grades 11, 12 *NCAA Approved* **Credit 1.50**

Prerequisites: “B” average in Chemistry 1 w/lab AND Biology Honors. “B” average in Pre-Calculus Honors or Pre-Calculus OR currently enrolled in Pre-Calculus Honors or Pre-Calculus. This course requires the completion of a summer enrichment assignment. The Advanced Placement Chemistry course is designed to be the equivalent of the general chemistry course usually taken during the first year of college (General Chemistry 101 and 102). The course contributes to the development of the students’ abilities to think clearly and to express their ideas, orally and in writing, with clarity and logic. This course differs qualitatively from Advanced chemistry course with the kind of textbook used, the topics covered, the emphasis on chemical calculations and the mathematical formulation of principles, and the kind of laboratory work done by the students. This course will prepare students to take the College Board AP Chemistry Exam.

AP ENVIRONMENTAL SCIENCE W/LAB 4444

Grades 11, 12 *NCAA Approved* **Credit 1.00**

Prerequisites: “B” average in PA Science Honors, Biology 10 Honors, AND Chemistry 1 w/lab. This course requires the completion of a summer enrichment assignment. The goal of the AP Environmental Science course is to provide students with the scientific principles, concepts, and methodologies required to understand the interrelationships of the natural world, to identify and analyze environmental problems both natural and human-made, to evaluate the relative risks associated with these problems and to examine alternative solutions for resolving and/or preventing them. Topics of the course include: Earth systems and resources, the living world, population, land and water use, energy resources and consumption, pollution, and global changes. This course will prepare students to take the College Board AP Environmental Science Exam.

AP PHYSICS 1 (ADVANCED PLACEMENT) W/LAB 4441

Grades 11, 12 *NCAA Approved* **Credit 1.50**

Prerequisite: “B” average in Algebra 2 Honors; also students should have completed OR currently be enrolled in a Pre-Calculus course. AP Physics 1 is an algebra-based, introductory college level physics course. It explores Newtonian mechanics (force and motion), work and energy, mechanical waves and sound, and electrical circuits. This course is recommended for students who are planning a career in engineering or science. Laboratory work, including the use of computers as a data collection and analysis tool, is a major component of the course. Math principles will be applied to a variety of physical situations, so students should have an excellent command of algebra. Juniors planning to take AP Physic C should take this course as a prerequisite. Seniors may take AP Physics 1 as a math credit IN PLACE OF a science credit. AP Physics 1 MAY NOT be used as both a math and science credit toward graduation requirements.

AP PHYSICS C (ADVANCED PLACEMENT) W/LAB 4404

Grade 12 *NCAA Approved* **Credit 1.50**

Prerequisite: Completion of AP Physics 1 with an “A” average OR approval from AP Physics 1 teacher. Physics Honors students may enroll in this course with an “A” average in Physics Honors AND Physics teacher approval.; In addition the math requirements for ALL STUDENTS must be a “B” average in Pre-Calculus Honors or “A” average in Pre-Calculus. Students should have completed or be currently enrolled in an AP Calculus course. The AP Physics course is designed for a student planning to enter an engineering, scientific, or physical science education career. It is the equivalent of the first year of a calculus-based college physics course. The aim of the course is to develop the student’s ability to interpret physical information, analyze physical problems in a sequence of steps, apply mathematical reasoning to physical situations, and perform and analyze experiments. The topics include motion (kinematics and dynamics), vectors, equilibrium, energy, rotational motion, oscillations, gravitation, electric force and fields, circuits, magnetism, and electromagnetic relationships. Laboratory work, including the use of computers as a data collection and analysis tool, is a major component of the course. Seniors may take AP Physics as a math credit IN PLACE OF a science credit. AP Physics MAY NOT be used as both a math and a science credit toward graduation requirements.

SOCIAL STUDIES

- UNITED STATES HISTORY 9 – 1607 to 1900** 2200
Grade 9 *NCAA Approved* **Credit 1.00**
This United States History course studies the period from colonization to the turn of the century era of events. Written and oral communication skills will be emphasized, in addition to analyzing and interpreting historical and cultural information.
- UNITED STATES HISTORY 9 HONORS – 1607 to 1900** 2202
Grade 9 *NCAA Approved* **Credit 1.00**
Prerequisite: This course requires a final grade of a “B” or better in the students 8th grade History course and the recommendation of their history teacher. This United States History course studies the period from colonization to 1900 in America. Written and oral communication skills will be emphasized, in addition to analyzing and interpreting historical and cultural information. The Honors students must accept that he/she will be required to complete additional academic work and extra reading material outside of the classroom and guidelines will be stricter than those for a general history class.
- UNITED STATES HISTORY 10 – Contemporary U.S. 1900 to the present** 2201
Grade 10 *NCAA Approved* **Credit 1.00**
This United States History course studies the development of our country from 1900 to the present. Current events are also an integral part of this offering. Written and oral communication skills will be emphasized, in addition to analyzing and interpreting historical and cultural information.
- UNITED STATES HISTORY 10 HONORS - Contemporary U.S 1900 to present** 2203
Grade 10 *NCAA Approved* **Credit 1.00**
Prerequisites: This course requires a final grade of a “B” or better in U.S. History 9 Honors or an “A” in U.S. History 9. The student must also obtain the recommendation of their history teacher. Topics that are emphasized include politics, domestic policy, and foreign relations. Current events are also an integral part of this offering. Written and oral communication skills will be emphasized, in addition to analyzing and interpreting historical and cultural information. The Honors student must accept that he/she will be required to complete additional academic work and extra reading material outside of the classroom and guidelines will be stricter than those for a general history class.
- WORLD HISTORY - 1450 C.E. to the present** 2211
Grade 11 *NCAA Approved* **Credit 1.00**
This course will explore the major developments in World History from 1450 C.E. to the present with particular emphasis on political, geographic, cultural, economic as well as historical perspective. Written and oral communication skills will be emphasized, in addition to analyzing and interpreting historical and cultural information.
- WORLD HISTORY HONORS - 1450 C.E. to the present** 2212
Grade 11 *NCAA Approved* **Credit 1.00**
Prerequisite: This course requires a final grade of a “B” or better in U.S. History 10 Honors or an “A” in US History. The student must also obtain the recommendation of their history teacher. This course will explore the major developments in World History from 1450 C.E. to the present with particular emphasis on political, geographic, cultural, economic as well as historical perspective. At the Honors level, the course is an accelerated academic study. Research and independent study will be an integral part of the course. Students will be required to participate in additional activities to complete the program. Written and oral communication skills will be emphasized, in addition to analyzing and interpreting historical and cultural information. The Honors student must accept that he/she will be required to complete additional academic work outside the classroom and that the guidelines will be stricter than those for a general world cultures class.
- CONTEMPORARY AMERICAN DEMOCRACY** 2221
Grade 12 *NCAA Approved* **Credit 1.00**
Prerequisite: This course is required for all seniors with the exception of those who are taking CAD-Honors.
The purpose of this course is to provide the students with an overview of economics and American government. Students pursue an in-depth study of consumerism and function of government. Written and oral communication skills will be emphasized, in addition to analyzing and interpreting historical and cultural information.

CONTEMPORARY AMERICAN DEMOCRACY HONORS 2220

Grade 12 *NCAA Approved* **Credit 1.00**

Prerequisite: This course requires a final grade of a “B” or better in World History Honors or an “A” in World History.

The purpose of this course is to provide the students with an overview of economic principles of a market economy, and the contemporary application of the function of government, each of which will cover one semester. The economics semester will include microeconomic principles for both production and consumerism, macroeconomic principles of our free-market economy, environmental economics, the stock market, and consumer behavior. The government semester will address the contemporary functions of all three branches of government, with an emphasis on politics, congressional procedures, and the Supreme Court. Topics will include campaign restrictions and practices, elections, international diplomacy, changing political influences, and landmark rulings and their effects on current society. Honors students are subject to a more rigorous assessment schedule, a more demanding workload, and a higher expectation of outside reading and writing assignments than general students. Assessments will include news-based quizzes, chapter and multi-chapter exams, presentations, quizzes, and projects. There will be a final exam at the end of each semester.

AMERICAN POLITICS (College in High School) 2238

Grades 11 and 12 *NCAA Approved* **Credit 1.00**

Prerequisite: This course requires a final grade of a “B” or better in their prior Honors History and Honors English course. This is an introductory course in American Political Science. The purpose of this course is to teach students about the American political system and about broad concepts used by social scientists to study politics. Topics will include the Constitution, the powers of Congress, the Presidency and Judiciary, Civil Rights and Liberties, Public Opinion, Voting, and Elections. Students have the potential to individually pay and earn college credit through the University of Pittsburgh. Due to this, the rigor of the course will be comparable to that of an Advanced Placement or first-year college course.

CIVIC LEADERSHIP IN ACTION I 2236

Grades 10, 11, 12 **Credit .50**

A semester course open to 10th, 11th and 12th grade students focused on the history and theory of leadership. Along with development of communication skills and personal strengths this course will help students research, develop and empower his/her own personal leadership style. Leadership topics that will be developed through small group and large group discussions will include; organizational culture, influence, persuasion, active listening, time management, goal setting, intrinsic and extrinsic motivation, and empowerment.

CIVIC LEADERSHIP IN ACTION II 2237

Grades 10, 11, 12 **Credit .50**

Prerequisite: Civic Leadership I. A semester course open to 10th, 11th and 12th grade students focused at the mission of leadership. As a follow up to Civic Leadership I, this class will enhance a student’s personal leadership style and drive vision in implementation. Leadership topics that will be developed will include; group behavior, team building, decision-making, paradigm shifts, and strategic planning. In particular, the following leadership models will be discussed: transactional, transformational, servant, situational, emergent, strategic, and team. Leaders from the business, educational, political, and athletic worlds will speak to the students and have a question and answer session with them. Using majority rules, the students will select a cause and implement what they have learned in Civic Leadership 1 and 2 into a service project.

LAW & CITIZENSHIP: KNOW YOUR RIGHTS! 2235

Grades 10, 11, 12 *NCAA Approved* **Credit .50**

Know Your Rights is a class designed to teach students about American Constitutional Law as it relates to high school students. In this class, students will be able to read and analyze American case law and evaluate the decisions of the United States Supreme Court. Topics to be discussed include Free Speech, Search and Seizure, and Criminal Rights. The course work will include readings that may be challenging for an average or below-average reader, and students will be required to write papers or create class presentations as means of assessment and evaluation. The course will also include a great deal of small and large group discussion.

MENTAL AND SOCIAL HEALTH (MASH) 2231

Grades 10, 11, 12 **Credit 1.00**

This elective is an introductory course in the basic concepts of general psychology. Among topics covered are child development, emotions, needs, learning principles and theories, relationships social problems, mental health, mental illness and therapy. **NOTE: Students who take MASH cannot take AP Psychology.**

AP EUROPEAN HISTORY (ADVANCED PLACEMENT)

2234

Grades 9, 10, 11, 12 *NCAA Approved*

Credit 1.00

Prerequisites: This course requires a final grade of a “B” or better in their prior Honors History course and a final grade of a “B” or better in their Honors level English course. The student must also obtain a recommendation from their current history teacher. There will also be a mandatory summer assignment.

The study of European History since 1450 introduces students to cultural, economic, political, and social developments that played a fundamental role in shaping the world in which they live. Without this knowledge, we would lack the context for understanding the development of contemporary institutions, the role of continuity and change in present-day society and politics, and the evolution of current forms of artistic expression and intellectual discourse. In addition to providing a basic narrative of events and movements, the goals of the AP program in European History are to develop (a) an understanding of some of the principal themes in modern European History, (b) an ability to analyze historical evidence and historical interpretation, and (c) an ability to express historical understanding in writing.

AP PSYCHOLOGY (ADVANCED PLACEMENT)

2232

Grades 9, 10, 11, 12 *NCAA Approved*

Credit 1.00

The goal of this course is to increase the understanding of psychology, its methods, theory and research. The course will explore the psychological facts, principles and phenomena associated with each of the major subfields within psychology. This course is taught at the collegiate level and student study habits and participation should reflect this fact. The basic objective of this course is to introduce the student to the methods, theory and research of psychology. It is hoped that knowledge of psychological inquiry will provide the student with a way of perceiving aspects of the complexity of human behavior. NOTE: Students who take MASH cannot take AP Psychology.

AP UNITED STATES HISTORY (ADVANCED PLACEMENT)

2222

Grade 10(Core), Grades 11, 12(elective) *NCAA Approved*

Credit 1.00

Prerequisites: This course requires a final grade of a “B” or better in their prior Honors History course and a final grade of a “B” or better in their Honors level English course. The student must also obtain a recommendation from their current history teacher.

The AP program in United States History is designed to provide students with analytical skills and factual knowledge necessary to deal critically with the problems and materials in U.S. history. The program prepares students for intermediate and advanced college courses by making demands upon them equivalent to those made by full-year introductory college courses. Students should learn to assess historical materials – their relevance to a given interpretive problem, their reliability, and their importance – and to weigh the evidence and interpretations presented in historical scholarship. AP U.S. History students will develop the skills necessary to arrive at conclusions on the basis of an informed judgment and to present reasons and evidence clearly and persuasively in an essay format. Summer work is required. Students are encouraged to take the AP United States History Exam in May.

AP WORLD HISTORY (ADVANCED PLACEMENT)

2209

Grades 11 (core), 12 (elective) *NCAA Approved*

Credit 1.00

Prerequisite: This course requires a final grade of a “B” or better in AP American History or their prior Honors History course and a final grade of a “B” or better in their Honors level English course. The student must also obtain a recommendation from their current history teacher.

AP World History will enable students to develop an understanding of world processes and the evolution of different societies. It emphasizes relevant factual knowledge, interpretive issues, and skills in analyzing historical evidence and research. The course offers a balanced global coverage with Africa, the Americas, Asia, Europe, and Oceania all represented. The timeline will cover 8000 B.C.E. to the present and highlight topics such as philosophies, arts and architecture, religions, trade and commerce, revolutions, and ethnic constructions. Students can expect independent reading assignments, and intensive verbal and written analysis. The course will also correspond to the AP Exam to be facilitated in May.

TECHNOLOGY EDUCATION

ARCHITECTURAL DESIGN I

0592

Grades 9, 10, 11, 12

Credit .50

This course prepares students who wish to pursue post high-school education in Architecture or Interior Design. Students will explore the methods and techniques used in designing architectural residences both technically and aesthetically with the use of a wide variety of media. The design and layout of each room of a residence will include a plan, elevation and perspective with emphasis upon interior design. This course utilizes professional software called Autodesk REVIT. Students will develop realistic models that will visually represent their electronic designs. Evaluation will be based upon successful completion of a set of working drawings, a model, quizzes, and teacher observations.

ARCHITECTURAL DESIGN II

0596

Grades: 10, 11, 12

Credit .50

Prerequisite: Architectural Design I. Students in Architectural Design II will further explore the methods and techniques used in designing residential and commercial buildings as well as model fabrication to depict realistic views on design. Students will utilize REVIT software and physical model prototyping to explain solutions; student will complete a job shadow as well as on site-real world problem solving. The studio aspect of the course will include spatially abstract exercises to more complex programs that require integrative thinking at various scales and situated on sites of increased complexity, while integrating ecological, landscape, and tectonic demands. In all four stages of the visualization sequence, hand, digital, 2-D, and 3-D methods are explored. Student evaluations will be based on successful completion of assignments, quizzes, tests, projects and teacher observations.

CMTV BROADCASTING

0579

Grade 11, 12

Credit.50

Prerequisites: Students must have completed at least one public speaking course at the high school and have the written recommendation of the public speaking teacher. This course will offer experienced public speaking students the exposure to the production aspects of a news broadcast from in front of the camera. Students will be responsible for the broadcasting of morning announcements via the CMTV production studio. Broadcasting students will work in conjunction with CMTV production crew.

CMTV PRODUCTION

0580

Grades 11, 12

Credit 1.00

Prerequisites: Students must have successfully completed the digital video course and have the written recommendation of the digital video teacher. CMTV classes are designed to further a student's knowledge in the area of television production and broadcast journalism. In this class, students will supervise all aspects of LIVE television broadcasting as well as prepare graphic overlays, offline media, and stand-alone videos for broadcast in house, and later to the community. Students will not work exclusively in the television studio, but will also be expected to produce commercials, promotional videos, etc. Some degree of community involvement will be required. CMTV will be a product oriented course, as students will be expected to produce daily announcements for broadcast throughout the school.

COMMUNICATION DESIGN ENGINEERING

0588

Grades 9, 10, 11, 12

Credit 1.00

Communication Design Engineering introduces students to a variety of graphic processes. The students have the opportunity to engage in the design, planning, reproductions, and finishing of the numerous products. Lectures and demonstrations on the principles and procedures of graphics are used to supplement the activities on which the course is based. Students will work with Corel DRAW, and Adobe Photoshop to complete the required assignments. Examples of these assignments include, but are not limited to vinyl decals, license plates, desktop publishing, heat transfer t-shirts, screen printing apparel, and laser engraving.

DESIGN AND INNOVATE

0591

Grades 9, 10, 11, 12

Credit .50

This fun and engaging course offers opportunity for students to cultivate creativity and experience innovation. Students rely on inquiry and hands-on problem solving as they integrate lessons from science, technology, engineering, art, and math (STEAM). Project focus will be on appropriate/sustainable technologies and local/global issues. This “learning by doing” environment is fueled by the design process and inquiry-based thinking as student’s research, exchange ideas, design parts, build models, and make modifications all while collaborating to develop solutions to problems. Students will have opportunity to use software programs such as CADD, CorelDraw, Photoshop, and various equipment within the TE Department including 3D printer, laser engraver, vinyl cutter, wood fabricating machinery and more. The course will culminate with an end of project presentation.

DIGITAL VIDEO PRODUCTION

0578

Grade 9, 10, 11, 12

Credit .50

This course is intended for the student who wishes to gain knowledge in the ideation, development, and production of digital media. Students will learn concepts and techniques associated with the creation of videos and other methods of digital communication. Proper procedures in multimedia will be discussed. Students will be grounded by a strong multimedia theory but will work in a hands-on environment and will be exposed to lighting, audio engineering, filming, producing, and editing of video productions. Students will be exposed to online and offline editors and be trained in the proper use of each. Each student will be responsible for producing a final video as completion of the course requirements.

ENGINEERING DESIGN I

0593

Grades 9, 10, 11, 12

Credit .50

This course prepares students who wish to pursue post high-school education in Engineering. Students in Engineering Design will explore the methods and techniques used in designing and producing consumer goods electronically and physically. Students will utilize Autocad & Inventor softwares and physical model prototyping to explain solutions. Students will explore activities in the areas of transportation, structure, and consumer goods manufacturing. Student evaluations will be based on successful completion of assignments, quizzes, tests, projects and teacher observations.

ENGINEERING DESIGN II

0597

Grades: 10, 11, 12

Credit .50

Prerequisite: Engineering Design I. Students in Engineering II research, develop, test, and analyze engineering designs using criteria such as design effectiveness, public safety, human factors and ethics. Students will utilize Autocad & Inventor softwares and physical model prototyping to explain solutions; students will complete a job shadow as well as on site-real world problem solving. This course will encompass project and research based computer aided drafting and designs that extend the learning experiences. Students will focus in selected disciplines of engineering areas such as: manufacturing, power/energy/transportation, agriculture, bio-medical, robotics, hydraulics, electricity/electronics, communications, construction systems, alternative energy and computer aided design, and problem solving. Student evaluations will be based on successful completion of assignments, quizzes, tests, projects and teacher observations.

FOUNDATIONS OF TECHNOLOGY

0586

Grades 9, 10, 11, 12

Credit .50

Prerequisite: The completion of Communication Design Engineering with a “C” or better OR completion of Design & Innovate with a “C” or better. This exciting course explores the strategy and operations of a manufacturing enterprise resulting with the development of products to be sold at the CM School Store. In conjunction with students enrolled in Entrepreneurship II, students will be engaged in collaborative, minds-on, hands-on learning activities bridging manufacturing methodology with real-world manufacturing applications. Students will learn how to use CorelDraw software, the laser engraver, the vinyl cutter, heat press, and screen printing techniques. Students apply what they learn to create a diverse collection of products for the school store.

PHYSICAL APPLICATIONS OF TECHNOLOGY I

0587

Grades 9, 10, 11, 12

Credit .50

This course provides students with an introduction to tools, materials, and processes used to solve problems using the physical technologies. The content is presented in lecture/discussion and activity based methodologies. The goal is to provide a broad picture of manufacturing tools, materials, and processes and how they can be applied in day to day life, as well as their application in a career-based on technical skills. Students will complete 1-2 projects to practice the skills and methods learned.

PHYSICAL APPLICATIONS OF TECHNOLOGY II**0595****Grades 10, 11, 12****Credit .50**

Prerequisite: Physical Applications of Technology I. This course will build upon what students learned in Physical Applications of Technology I. The class will discuss and utilize the design process to design a project of their own choosing while using the lab equipment to bring their designs to fruition.

ROBOTICS I**0572****Grades 9, 10, 11, 12****Credit .50**

This course will introduce students to Agile Robotics Systems. Students will begin by designing and building a robot to complete a task. This robot will serve as a basic platform to apply both radio control and autonomous programming skills. Throughout the course students will learn and apply problem solving, teamwork, and time management skills. Assessment for the course will be based on tests, completion of projects, programming activities, and class participation.

ROBOTICS II**0573****Grades 10, 11, 12****Credit 1.00**

Prerequisite: The completion of Robotics I with a "C" or better. This rigorous course focuses on advanced robotic topics to create a robot from scratch for competing in the Bots IQ competitions. The Bots IQ competition involves creating a battlebot type robot to compete against other school districts. The course provides a unique, hands-on experience that also aids them in the discovery of career possibilities in engineering, manufacturing, and other STEM related fields. This project involves a partnership with local businesses for assistance in planning and manufacturing the custom parts associated with the project. Students are also provided with the opportunity to visit and network with local engineers at these businesses. A few of the topics that students will learn about consist of: Project Planning and Organization, Robot Design, Material Types, Electronic and Circuitry, Drawing with 3D CADD software, Machining Processes, 3D Printing, Engineering Documentation, and Fasteners. This is the perfect class for the eager and motivated student that wants to build beyond what is offered in standard building kits. Possible afterschool involvement may be expected for the completion of this project. Assessment for the course will be based on the successful completion of tests, projects, assignments, participation, and teacher observation.

ARTS & HUMANITIES COURSES

Advanced Art Honors*	CMTV Production*	Jazz Ensemble*
Advanced Latin Honors	Communication Design Engineering *	Jazz Lab Band*
Advanced Technological Design	Engineering Design I/II*	Latin I/II
American Politics (CHS)	Concept & Creative Thinking*	Latin Advanced Honors
American Popular Music*	Concert Choir*	Law & Citizenship
AP Computer Science Principles	Creative Writing*	Media & Technique*
AP Computer Science	Design & Innovate*	Mental & Social Health

CANON-MCMILLAN HIGH SCHOOL **PARENT PLANNING AND PREPARATION TIMELINE**

FRESHMEN

~ PARENT PLANNING AND INFORMATION ~

ORIENTATION DAY for 9th grade students is held generally the first Monday before the new school year begins. Please check the 2019-20 school calendar (when it is available) for the date.

SCHEDULES are made available online in August. Please be sure that he/she has all the major classes scheduled. Schedule change requests may be submitted using the online form.

ATTENDANCE is essential to academic performance and required by State law! Please know when your student has 3 unexcused absences, he/she will be referred to BluePrints, the district truancy elimination plan program.

ACADEMIC PROGRESS should be monitored. Please help your child set realistic goals each grading period. Check the school calendar for scheduled dates for progress reports and report cards. Attend Open House in September to meet with your child's teachers and schedule a conference in November, especially if your child is having difficulty in a certain class.

POWERSCHOOL should be checked daily for progress and attendance. Email the teachers if you have concerns about your child. Please make sure your email address is up-to-date so you can receive email blasts. If you have a change in address, notify Guidance of the change.

SCHOOL COUNSELING RESOURCE GROUP on SCHOODOLOGY is a great source of information for parents and students. You can find important information on career development, national testing (SAT/ACT), paying for college, volunteer and job and scholarship opportunities, and much, much more.

EXTRACURRICULAR ACTIVITIES should be encouraged in both in and out of school. Be sure that the activities are not impacting student grades. Colleges like to see that students have good time management skills and can maintain grades while involved in other activities. This would be a good time to begin some volunteering in your community as well. Volunteer opportunities are posted in the school counseling office and announced on CMTV.

WESTERN AREA CAREER AND TECHNOLOGY CENTER is available to interested students beginning in the sophomore year. Freshman students will be able to attend tour of Western Area CTC, usually in February or March. If you have any questions about the WACTC program, please contact Mrs. Kathleen Sharkady, CMHS Counselor, (724)745-1400 ext. 5023.

NCAA – If you are planning to play sports in college, check with your school counselor to see if your courses are NCAA approved. You can register with the NCAA at the end of 10th grade. If you have any questions, please contact Mr. Mike Evans, Associate Athletic Director, (724)745-1400 ext. 5002.

SOPHOMORES

~ FALL SEMESTER ~

MONITOR ACADEMIC PROGRESS - Continue to monitor your child's progress. The parental component of the PowerSchool System provides access your child's progress. Be sure to keep in touch with your child's teachers via phone or e-mail. Make sure you have created a PowerSchool account to access report cards and progress reports.

HIGH SCHOOL GUIDANCE WIKI - Please join the guidance office wiki for information on scholarships, jobs, important announcements, and more. Please contact the school counseling office for more information.

PSAT - All sophomores are required to take the PSAT in October. Visit www.collegeboard.org for more information on this and other testing and post-secondary resources. For accommodations, see Mrs. Rubican.

GET INVOLVED - The people who read college applications are not looking just for grades. Get your child involved in activities outside the classroom. He can work toward leadership positions in the activities he likes best. Encourage your child to become involved in community service for volunteer hours.

READ, READ, READ! - Encourage your child to read as many books as he can. Read the newspapers every day to learn about current affairs. Be sure to work on writing skills---everyone needs them.

SOPHOMORES

~ SPRING SEMESTER ~

NCAA - Check with your counselor to be sure that you are taking a core curriculum that meets the NCAA requirements (Division I & II). Register with NCAA Clearinghouse at the end of 10th grade. For more information visit www.eligibilitycenter.org or contact Mr. Mike Evans, Associate Athletic Director, (724)745-1400 ext. 5002.

EXPLORE COLLEGE AND CAREER OPTIONS - Start to gather information, go to college fairs, and begin to make informal visits to colleges or technical schools. Discuss your son or daughter's aptitudes, interests, and abilities with him/her, and begin to view these in terms of possible college majors and/or career options. Visit www.collegeboard.org or www.pacareerzone.org

SCHEDULING - Review your child's four-year high school plan. Read the Program of Studies booklet with your child and be sure he/she has selected the correct classes. Note the prerequisites for all classes.

MILITARY ACADEMIES - If your child is interested in attending a military academy such as West Point or United States Naval Academy now is the time to start planning and getting information.

CONTINUE SAVING FOR COLLEGE/ TECHNICAL SCHOOL - Keep putting money away for post high school education. Encourage your son/daughter to get a summer job.

PLAN SUMMER ACTIVITIES - Help your son or daughter choose meaningful activities for the summer months. If possible, look for activities that relate to a career or career field he/she is considering.

JUNIORS

~ FALL SEMESTER ~

CREDITS - Verify with your counselor that you have scheduled the required courses/credits necessary to graduate. Also be sure you have the required courses necessary for the colleges you are considering.

COLLEGE FAIRS - Use this opportunity to meet with many college representatives from across the country. (National College Fair, California University of PA Fair) Make college contacts and request information.

TESTING - Take the PSAT in October to be eligible for National Merit Scholarship competition and to give an indication of projected SAT scores. Check also for SAT and/or Act testing. Check with your schools you are considering to verify which test scores are required---SAT I, SAT II Subject Tests and/or ACT. Juniors usually take the SAT's in May or June of their Junior year, and ACT's in April or June. Visit www.collegeboard.com. Fee waivers may be available for those who qualify. See your school counselor.

NCAA - File NCAA Clearinghouse forms if participating in Division I or II athletics. For more information visit www.eligibilitycenter.org or contact Mr. Mike Evans, Associate Athletic Director, (724)745-1400 ext. 5002.

COLLEGE/TECHNICAL/MILITARY REPRESENTATIVES - Check with School Counseling Department to see when

they will be visiting CMHS.

RESEARCHING POSTSECONDARY SCHOOLS - Explore colleges and trade/technical schools using various resources such as Internet (home or Guidance computer), college catalogs, videos, college and career guidance books.

POST-SECONDARY SCHOOL VISITATIONS - Begin visiting some colleges you are considering. Make an appointment with the Admissions Counselor and the Financial Aid Office. Take an unofficial transcript (from Guidance). Tour the campus and classrooms, preferably when school is in session.

JUNIORS

~ SPRING/SUMMER ~

NCAA - Check with your counselor to be sure that you are taking a core curriculum that meets the NCAA requirements (Division I & II). Register with NCAA Clearinghouse at the end of 11th grade. For more information visit www.eligibilitycenter.org or contact Mr. Mike Evans, Associate Athletic Director, (724)745-1400 ext. 5002.

COLLEGE TESTING - Register for the ACT or SAT during your spring semester. Test prep information can be found in the guidance dept. Free waivers may be available for those who qualify.

COLLEGE VISITS - Visit colleges, gain work and volunteer experience, consider summer enhancement and remedial classes, refine a list of post-secondary schools and career options.

SENIORS

~ SEPTEMBER ~

APPLICATIONS - Contact at least 4-6 schools for applications.

POST-SECONDARY SCHOOL VISITATIONS - Be sure to attend open houses and weekend overnights for prospective freshmen.

POST-SECONDARY REPRESENTATIVE MEETINGS - Be sure to register in Guidance to meet with school reps who visit CMHS. Lists of the schools are sent to all English classes and available in Guidance at the beginning of each month. Be sure to sign the book in Guidance and a pass will be sent to your first period class on the scheduled date.

COLLEGE TESTING - If necessary, register for the October and/or November SAT, and or ACT. Fee waivers may be available for those who qualify.

NCAA - File NCAA Clearinghouse forms if participating in Division I or II athletics. For more information visit www.eligibilitycenter.org or contact Mr. Mike Evans, Associate Athletic Director, (724)745-1400 ext. 5002.

SCHOLARSHIPS - Several scholarship resources can be found on the School Counseling Resources Group on Schoology. In addition, scholarship opportunities are regularly announced at the high school. Scholarships announcements are also sent to parents via an email blast. Please make sure your email address is up-to-date.

MALE STUDENT - Must register for Selective Service on your eighteenth birthday to be eligible for federal and state financial aid.

GRADUATION PROJECT - Prepare for your presentation. A satisfactory rating is necessary to fulfill the high school graduation requirement.

FINANCIAL AID NIGHT - Be sure to attend the high school financial aid night to learn about the FAFSA process.

SENIORS

~ OCTOBER ~

APPLICATIONS - Begin submitting transcript requests forms to your counselor and allow up to two weeks for processing your application. (Give small envelope with two stamps or large envelope with 3-4 stamps.) Be sure to give your teacher two weeks for his/her letter of recommendation. (Give teacher a profile sheet and a stamped, college addressed envelope, so it can be sent by teacher.)

COLLEGE TESTING - SAT I AND SAT II, AND ACT TESTS are administered at CMHS. If necessary, register to take the December SAT I, II, and/or ACT. Fee waivers may be available for those who qualify. See your school counselor.

EARLY DECISION CANDIDATES - Be certain that everything is submitted before the deadline.

SERVICE ACADEMY REQUESTS FOR NOMINATIONS - Must be submitted to your Congressman/Senator by mid-October.

FINANCIAL AID - File FAFSA form as soon after October 1st as possible. Check with the colleges for their deadlines. Many post-secondary schools have their own financial aid form that needs to be completed in addition to the FAFSA form. The FAFSA forms can be obtained in the Guidance Office or at www.fafsa.ed.gov/ to download the forms or to file electronically. The Counseling Department hosts a financial aid event in October.

GRADUATION PROJECT - Prepare for your presentation. A satisfactory rating is necessary to fulfill the high school graduation requirement.

SENIORS

~ NOVEMBER ~

COLLEGE APPLICATIONS - Many colleges request that applications be sent before Thanksgiving Day. Late applicants may be put on waiting lists for admissions. **DO NOT WAIT TO TAKE ADDITIONAL SATS OR ACTS BEFORE SUBMITTING YOUR APPLICATIONS.**

GRADUATION PROJECT - Prepare for your presentation. A satisfactory rating is necessary to fulfill the high school graduation requirement.

SENIORS

~ DECEMBER ~

COLLEGE BOARD TESTING - SAT I, SAT II, and ACT are given (not at CMHS). Fee waivers may be available for those who qualify.

APPLICATIONS - Be sure that you have met your deadlines. Complete all January deadline applications by mid-December. If you submitted your application in October or November (on rolling admission), you should be receiving notification.

GRADUATION PROJECT - Prepare for the Spring presentation. A satisfactory rating is necessary to fulfill the high school graduation requirement.

SENIORS

~ JANUARY ~

GRADUATION REQUIREMENTS - Graduation requirements should be verified. Order cap and gown and graduation announcements.

MID-TERM GRADES - Some colleges request first semester grades.

GRADUATION PROJECT - Prepare for the April presentation. A satisfactory rating is necessary to fulfill the high school graduation requirement.

SENIORS

~ FEBRUARY, MARCH, APRIL ~

NOTIFICATIONS - Watch your mail between March 1st and April 1st for acceptance or rejection notifications from colleges. Also watch the mail for financial aid awards between April 1st and May 1st.

FINAL CHOICES - Make your final choice, and notify all schools of your intent by May 1st. Send your non-refundable deposit to your chosen school by May 1st as well.

GRADUATION PROJECT - Prepare for the presentation. A satisfactory rating is necessary to fulfill the high school graduation requirement.

FINANCIAL AID - Be sure to check on the status of your FAFSA, both at FAFSA.gov and on the college account.

SENIORS

~ MAY ~

AP AND/OR FINAL EXAMS - Prepare well for all final exams. Continue to focus on your schoolwork.

SEND COLLEGE FORMS AND FEES - Housing, candidate reply, etc. If you applied for a Pell Grant (on the FAFSA), you will receive a Student Aid Report (SAR) statement. Review this notice, and forward it to the college you plan to attend. Make a copy for your records.

COMPLETE SENIOR FOLLOW-UP SURVEY - Notify your counselor of your school choice. Indicate receipt of Scholarships or Special Awards.

FINAL TRANSCRIPTS - Must be mailed to the school that you plan to attend. Notify the guidance office of your post- secondary choice as soon as it is confirmed.
